

## **PainScript™ Revolutionizes Patient Care for Renowned Psychiatrist**

*Collaboration with Dr. Keerthy Sunder, MD aims to enhance patient care and treatment outcomes.*

**Washington, D.C. – May 18** – PainScript, a telehealth company focused on improving patient outcomes through care plan adherence and medication compliance, announced today its collaboration with Dr. Keerthy Sunder, MD, a distinguished double-board certified psychiatrist and Chief Medical Officer at Karma Doctors & Associates. The partnership is designed to provide innovative and personalized mental health treatment by integrating PainScript's platform into the Karma Doctors protocols which will allow Dr. Sunder to facilitate proactive treatment interventions and optimize patient care plans.

"PainScript represents a significant leap forward in patient care and outcomes, aligning perfectly with our vision at Karma Doctors & Associates," says Dr. Sunder. "The platform's real-time data, daily digital care, and medication monitoring capabilities empower us to create personalized treatment plans tailored to each patient's unique needs. This collaboration allows us to bridge the gap between physical or telemedicine appointments, ensuring continuous care and support for our patients."

"We are delighted to partner with Dr. Sunder, a distinguished psychiatrist renowned for his commitment to patient-centered care," said Jim Breidenstein, President and Chief Commercial Officer at PainScript™. "By leveraging our technology, which enhances medication and care plan adherence, Dr. Sunder's patients should have improved treatment outcomes, reduced relapse rates, and ultimately, better overall clinical mental health outcomes."

The collaboration between PainScript and Dr. Keerthy Sunder reflects a shared dedication to healthcare innovation, comprehensive patient care planning, and a commitment to leveraging technology to advance mental health treatment.

### **About PainScript™/HealthScript™**

PainScript™ ([www.painscript.com](http://www.painscript.com)) (AdhereRx, d/b/a PainScript™/HealthScript™) is a medical treatment compliance platform, focused on creating a personalized pathway to support chronic care interventions for patients suffering from pain, and opioid and other substance use disorders (SUD). The SaaS platform is technology based, clinically validated via nine (9) published and peer-reviewed clinical trials. PainScript's approach is very accessible and user-friendly via a digital platform to provide the physician and patients daily, evidence-based telehealth monitoring interventions designed to effectively improve patient compliance with treatment protocols, leading to better health outcomes and a reduction in related healthcare costs.

The platform aligns with several AMA CPT payment codes and uses daily contact between scheduled therapy treatments as the evidence demonstrates greater adherence to clinical protocols that, in turn, leads to an improved health benefit. The PainScript™ platform is designed with a HIPAA compliant, "concierge medicine" approach, allowing for real-time doctor-patient interactions, remote monitoring and communication, appointment scheduling and an early warning of treatment complications.
