

How Asset Infinity Enhanced the Efficiency of client by in-field Management of Medical 'Kits'

CLIENT PROFILE

Our client JnJ has brought many innovative ideas, products and services to improve the health and well-being of people in India. Our client spread its roots into India 70 years ago. They are currently working in more than 60 countries around the world to help people live longer, healthier, happier lives.

Due to many geographical locations our client possesses multiple number of 'medical kits' that they need to keep a track of. To meet the expectation of clients, they use ERP system to keep a track of their assets.

MEDICAL EQUIPMENT

PROBLEM ASSESSMENT

- JnJ works in different locations it is obvious that they have multiple sets of same assets, It was hard to keep a track of their Medical 'Kits' due to invisibility of assets.
- It is very important to have a hold on the total number of assets and the one which they have already deployed in the market, which they did not had.
- There was a need of a command view, approval hierarchy for asset deployment in the market.
- The client wanted to keep an accurate track of all the assets and in case of some problem to raise a ticket against them so that the problem is solved as soon as possible.
- Our client was in a need of summarized reports for them to keep a check on their 'Medical Kits', reports that tell them about their location, status and their ownership.

SUMMARY OF MEASURABLE BENEFITS

Asset Tagging & Tracking

No theft/misplacement - loss decrease.

Complete Asset Information (QR Code), with Command-level Visibility

Data-based decisions - optimum asset assignment - increase in earnings

Asset Identification and Accountability

Brings in accountability of asset - decreased mismanagement - increased efficiency and workflow.

Data synchronization throughout the organization

No chaos - Saves time and efforts.

HOW ASSET INFINITY RESOLVED THE CLIENT'S PROBLEMS

LEGACY STATUS

Keeping in mind that the presence of our client is worldwide, they had many locations to take care of their assets which in this case is their 'Medical Kits' which they supply to the various Certified Distributors on the market who further sell it to the Hospitals, which keeps the flow going.

All this was done manually, and no set of accurate data was collected which was a matter of huge concern for the client.

ASSET INFINITY SOLUTION

- With the help of Asset Infinity's Asset Management Software our client was able to keep a track of all their 'medical Kits', one which are being released from the main manufacturing center and the one which have been received by the distributor.
- With this it became very easy to keep a track of all the 'kits', keeping in mind how precious they are.

LEGACY STATUS

The 'Kits' that our clients distribute in the market are very expensive. Losing assets that are valuable is not a good sign of management in the organization. Our client was not able to keep an accurate track of their Medical Kits which they were to distribute in the market which at times failed them and led to heavy loss. They wanted to prevent this situation. .

ASSET INFINITY SOLUTION

- Asset Infinity helped the customer get a track of all their assets.
- All the assets can be tracked with the help of our software with real-time data updating that gives a sense of better understanding and reliability to everyone using the software at any end.
- No Medical 'Kit' was stolen or misplaced because of this, there was a huge some of money saved.

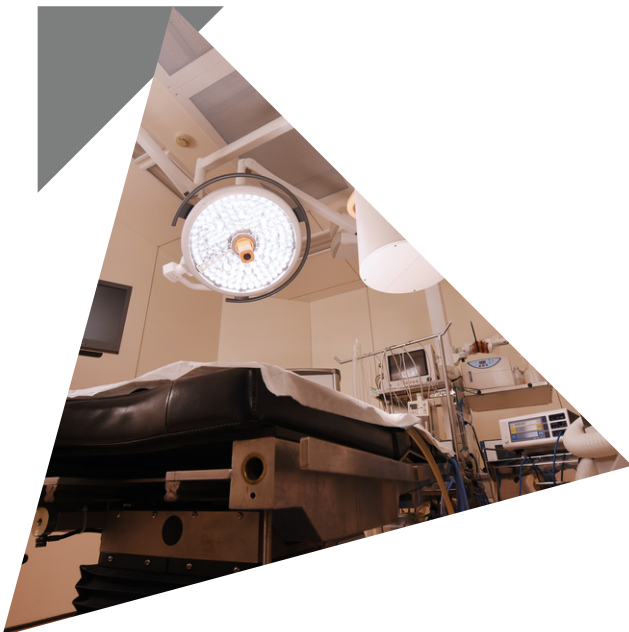

LEGACY STATUS

Our client was in practice of auditing its assets physically, but it led to several misinformation as it is very hard to physically verify the assets. To get real-time data and accurate track of all assets is what our client was in need of. It is important to know all the kinds of assets that the organization holds, also their live status and health. But all this was lacking because of physical verification.

ASSET INFINITY SOLUTION

- With the help of Asset Infinity's Asset Management Software it became very easy to keep a track of all the assets as physical verification of each asset was not necessary.
- Detailed data regarding the assets was in hold of the client since they started using our software.
- Auditing became very easy, knowing live status became easy too. As every Kit is being recorded and tracked in the system.

LEGACY STATUS

There is a lot of asset 'kit' movement involved in the business of our client which sometimes leads to mishandling of asset which then breaks it down. This breakage leads to monetary loss to the organization which no one is in favour of to keep a track of these breakages and mishandling one must have a set system to monitor all this movement.

ASSET INFINITY SOLUTION

- With the help of Asset Infinity's Asset Management Software, it became easy to keep a track of all the movement right from the dispatch from the manufacturers till it reaches the distributors after crossing all the check points.
- This helped our client to deal with the mishandling and knowing when the breakdown occurred if any.

CONCLUSION

- Asset Infinity's Asset Management Software was synced with the internal data of the organization which the client then used for better understanding of the data available to them and then to use it to its fullest.
- The client now has a complete view of the assets present in their organization. Complete visibility of the assets provided them with a comprehensive look of all the assets.
- The client was able to reduce the theft/misplacement of their 'medical kits' since they started keeping a track of them, keeping in mind how valuable they are it was important to have a good hold on all of them.
