

How Spreadsheet elimination helped a hospitality client achieve maximum efficiency

CLIENT PROFILE

Our client is a prominent name in Hotel Industry. It is a most premium property in India. The Hotel was struggling with their management of Hotel Assets/Inventory. Our team also helped the hotel Phusical Verification of their assets.

All the assets are being managed under our software that include IT Assets, Fixtures Furniture, Plant and machinery, electrical assets etc.

The Hotel has many locations that they work in and hence the asset count increases, and it becomes hard to keep a track of all the assets and that was the reason that they were in a need of Asset Management Software.

PROBLEM ASSESSMENT

- Whenever an organization becomes huge in number it becomes very hard to keep a track of all the assets as it is hard to verify them and remember their maintenance schedules, if all this is managed under an excel sheet which brings in no such benefit of reminder alerts etc.
- Location Verification Our client needed an Asset Management Software that would help them differentiate their assets based on floor differentiation/room differentiation.
- Sometimes there was need to know what the number of assets is present in a particular room etc. Even the room wise data is also available. Structural data is present for each and every location.
- For example, how many assets are present in room 101, they can just do a simple search and find out the exact number of assets in that room.
- Our client was also facing the problem of Physical Verification. They were in needto-know what assets are present with them and what are not. For this they need to physically verify the assets.

HOSPITALIT

SUMMARY OF MEASURABLE BENEFITS

Asset differentiation – floor based/room based etc

Asset Consolidation – optimum asset assignment – increase in earnings

Asset Tagging & Tracking

Asset Identification – Asset accountability and monetization – cost savings

Complete Asset Information (QR Code), with Command-level Visibility

Data-based decisions optimum asset assignment increase in earnings

Asset Audit & Physical Verification

Reduction in thefts and missed allocations – cost savings

Depreciation Calculation & Tracking

Data-based decisions for Asset retirement and replacement – rise in profits

Integration with ERP System for data synchronization and asset data retrieval

Savings in time, effort, and resources – cost savings

HOW ASSET INFINITY RESOLVED THE CLIENT'S PROBLEMS

LEGACY STATUS

During the course of their expansion, it is very important to keep a track of all your assets present at different locations. One must know the types and number of assets present at any location that too with who possess it.

ASSET INFINITY SOLUTION

- Asset Infinity helped the Client by keeping a complete track of the assets present with them.
- We helped the client by creating an Asset Register which has all the information related to their assets.
- With the help of our software, they were able to verify the set number of assets in their premises that to floor/area/room wise, which was seen as a huge advancement.

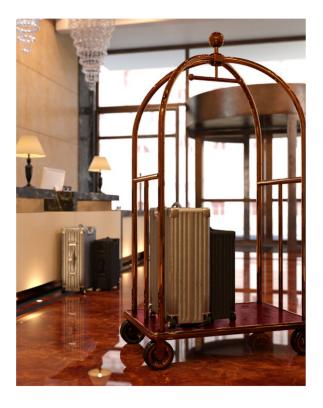

LEGACY STATUS

Our client is a multiple location Hotel Industry client, and it is obvious that it will lose multiple assets during the course of transmission of assets. The organization used to keep a track of assets through spreadsheets, which made it very difficult for the employees to judge current status of assets.

ASSET INFINITY SOLUTION

- With the help of asset infinity's Asset Management Software it became very easy to keep a track of Assets globally.
- No matter if the goods/assets are transported globally still it is possible to keep a track of assets.
- With the use of automated software a lot of money and time is saved. As there is minimum human interference.
- Because of minimum human interference the chances of human errors are also reduced to zero which makes the data transparent and ready to use for further decisions.

LEGACY STATUS

Our client being a prominent name in Hotel Industry deals with multiple sets of Assets which they also need to verify. This verification is very important, but while using Spreadsheets it was not possible to keep a track and verify every asset that is present, so they needed a software that does this for them.

ASSET INFINITY SOLUTION

- Asset Infinity provided the client with their Physical Verification module which helped them to keep a track of all their assets and inventory while verifying if they are present with them or not.
- Physical Verification helps an organization to know about the availability of any asset in their organization which then helps them to transfer that asset to a place where it can be used to its full extent.
- Knowing the situation of your assets also helps you to develop a sense of familiarity in the environment so that one can judge and locate all the assets perfectly.

Y HOSPITALITY

LEGACY STATUS

Our client was facing the problem of Loss of Asset because of Global Deployment of their Assets. They were not able to keep a track of their assets because of which they suffered heavy losses.

ASSET INFINITY SOLUTION

- Asset Infinity helped the client by making an 'Asset Register' for all the assets present with them.
- Our software also helped the client to track their assets globally using QR Code/Bar Code/RFID Code etc.
- With the help of Tags they were able to keep a track of all their assets that too globally, on a real time basis. This helped them to take crucial decisions based on Asset Visibility.

· CONCLUSION

- Asset Infinity asset
 management software
 was integrated with
 ERP system of the
 Client and used for
 different functional
 and reporting
 purposes.
- The Client had an enterprise-level control with complete asset visibility, comprehensive asset database and asset verification exercises.
- The Client was also able to significantly reduce asset thefts and losses arising due to absence of information.
