

How Asset Infinity helped keeping a track of multiple assets for an organization which works in E-commerce Industry

CLIENT PROFILE

Our client which specialized in the E-commerce business has more than 20 offices. Those offices are retail showrooms in which they buy second-hand cars. Their whole system is designed in a way that shows the client the rest available showrooms on which they can make the best deal.

With them having multiple retail showrooms, they are now stacked with multiple Assets, assets that they need to keep a track of and which they need to manage well. It includes fixtures, laptops and every other system device that the employees are using.

PROBLEM ASSESSMENT

- They are now stacked with multiple Assets, assets that they need to keep a track of and which they need to manage well. It includes fixtures, laptops and every other system device that the employees are using.
- To do all this manually while maintaining a spreadsheet on which they can see live changes and the owner with availability was very difficult. They were not able to keep up with the pace which then led them to lose important information. They needed a system which is optimized and systematically manages all their assets. By which they can see the change in their IT Assets on a real-time basis.
- They had several questions: How are IT Assets there in each Retail Outlet? Who possesses which IT Asset? What is the availability of certain assets that can be shifted to some other place where it is more needed? Were all the assets accounted for?

SUMMARY OF MEASURABLE BENEFITS

Asset Tagging & Tracking

No theft/misplacement - loss decrease.

Complete Asset Information (QR Code), with Command-level Visibility

Data-based decisions - optimum asset assignment - increase in earnings

Asset Identification and Accountability

Brings in accountability of asset - decreased mismanagement - increased efficiency and workflow.

HOW ASSET INFINITY RESOLVED THE CLIENT'S PROBLEMS

LEGACY STATUS

With them having multiple retail showrooms, they are now stacked with multiple Assets, assets that they need to keep a track of and which they need to manage well. It includes fixtures, laptops and every other system device that the employees are using.

To do all this manually while maintaining a spreadsheet on which they can see live changes and the owner with availability was very difficult.

ASSET INFINITY SOLUTION

- It is always best to have a true picture with the utmost truthfulness. Optimized systems help us with problems like these. In an optimized management system.
- All you need to do is just a few simple clicks and you will have a set report open right in front of you which is transparent the data present is on a real-time basis, which is anytime an add-on to the whole situation.

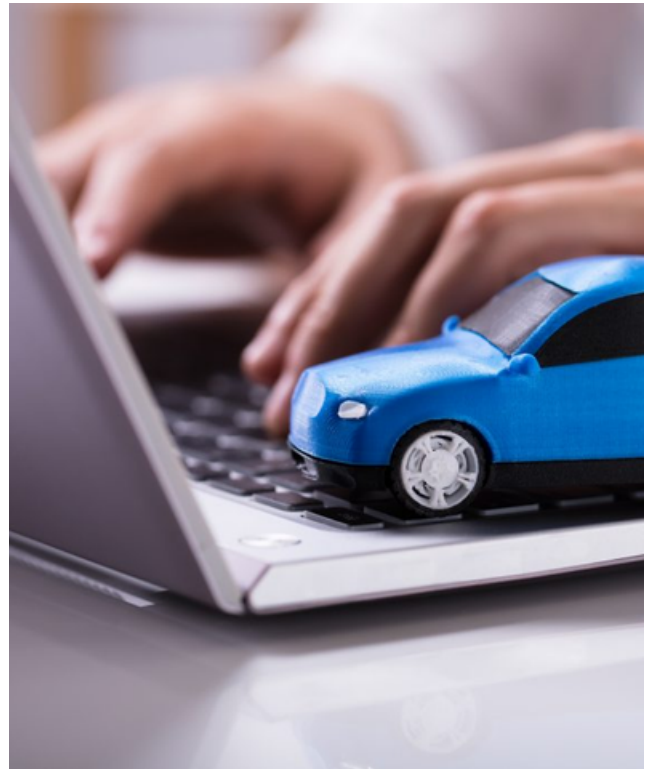

LEGACY STATUS

Maintenance of all the data in Spreadsheets and then maintaining that spreadsheet manually is a very difficult job. It leads to a lot of loss of information and mismanagement in the whole organization. Our client was in a clear need for an automated Asset Management Software.

ASSET INFINITY SOLUTION

- With the help of Asset Infinity's Asset Management Software our client was able to reduce the losses that were caused due to the use of Spreadsheets.
- With Asset Infinity's software our client was able to remove all the human error that was caused due to the use of Spreadsheets.
- With the use of automated software a lot of time, efforts and money was also saved by the organization.

LEGACY STATUS

Since they had a lot of Assets to take care of, they were lagging maintenance as they were not using any kind of software to do their job. All that was being done was done manually. Which led to loss of Assets and a lot more. This resulted into heavy losses for the organization.

ASSET INFINITY SOLUTION

- The maintenance issue impacted the efficiency of assets and the organization. Therefore, we ensured that every issue was addressed.
- With the help of Asset Infinity's Software a good track of all the assets was being kept which resulted into a favorable condition for all the departments in the organization.
- By good maintenance they no more lost assets and no one incurred losses because of that.

LEGACY STATUS

Because of the large number of locations and the size of the organization they were not able to keep a proper record of all the vendors and it was hard to manage their security deposits. And to have a record of this is very important, they were in a need of an automated software which keeps all the records.

ASSET INFINITY SOLUTION

- The purpose of managing security deposit was to ensure that retailer gets the cars or any asset equivalent to the amount deposited by the retailer.
- After that car was allotted to the retailer based on the security deposit amount. An e-challan was given (An electronic format for making payment and delivery used for depositing/remitting the contribution/statutory payment at bank/treasury). This was also a customized feature that we made for our client.
- Also, there was a format of challan designed as per the requirement of the client, which helped them to keep proper records.

CONCLUSION

- Asset Infinity automated the process of asset tracking with asset management software.
- It not only helped our clients in keeping track of assets, but it also helped them in keeping them maintained.
- It was a huge challenge because all these assets were spread-out in several locations, which is why tagging every asset was essential.
- It helped our client in scheduling asset maintenance whenever required.
- Whenever an unexpected asset breakdown or performance issue occurs the ticket is created and resolved in no time.
