

# How Asset Infinity helped the client to have complete visibility of their 'Pallets'

## CLIENT PROFILE

Our Client is India's largest fresh produce supply chain company that is solving one of the toughest problems in the world through technology.

They connect producers of food directly with retailers, restaurants, and service providers using in-house applications that drive end to end operations. Currently, their Supply Chain is equipped to move 1400 tons of perishables from farms to businesses, every day, in less than 12 hours. They are focused on making their innovation more accessible to the most fragmented parts of society. They intend to leverage our strengths and resources to innovate for new product categories and customer segments while solving complex supply chain problems.

## PROBLEM ASSESSMENT

- Due to several locations, it became very hard for them to keep a movement track of all the assets. Now with no track of their 'Pallet' in which they used to supply their products. This led to many further problems.
- They had no track of the IT Assets that they owned. Because of no tracking of these assets, they could not fix accountability which at times led to several problems like theft and misplacement.
- Due to no track of their 'pallets' our client could not judge the time taken for the product to reach the customer (dealer, in their case)
- With all the 'Pallets' on the go, it was very difficult for the client to keep track of their pallet and then to audit them on a time-to-time basis. Manual Auditing takes a lot of effort, time and money.

## SUMMARY OF MEASURABLE BENEFITS

### Asset Tracking

No theft/misplacement - loss decrease.

### Complete Asset Information (QR Code), Real-time

Data-based decisions - optimum asset assignment - increase in earnings

### Asset Identification and Accountability

Brings in accountability of asset - decreased mismanagement - increased efficiency and workflow.

### Automated Asset Audit

No chaos - Saves time and efforts.

## HOW ASSET INFINITY RESOLVED THE CLIENT'S PROBLEMS

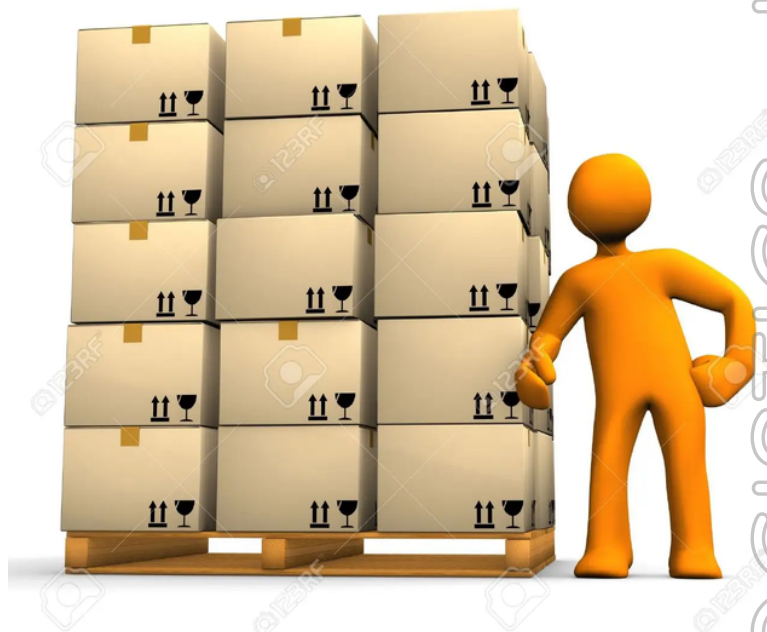

### LEGACY STATUS

As client directly deals with the Supply Chain Industry. It is well known that how hard it is to manage the Supply Chain. Due to several locations, it became very hard for them to keep a movement track of all the assets. Now with no track of their 'Pallet' in which they used to supply their products. This led to many further problems.

### ASSET INFINITY SOLUTION

- Asset Infinity provided help to the client by helping them with an automated solution of Keeping an accurate real time track of all their 'Pallets'.
- This helped them know at what place their products are, how much time it will take to reach the customers and they answered many more questions like this. Having an accurate track of all the assets helps an organization take crucial decisions.

## LEGACY STATUS

Our client works in different locations all over India, now they have multiple offices, and these offices hold different kinds of IT Assets. They had no track of the IT Assets that they owned. Because of no tracking of these assets, they could not fix accountability which at times led to several problems like theft and misplacement.

## ASSET INFINITY SOLUTION

- With the help of Asset Infinity's Asset Management Software, it became very easy to keep track of all their IT Assets.
- This solution can provide them with all the asset information in one click, now that helped the client set accountability in their organization added with a bit more security and trust in the organization

## LEGACY STATUS

Due to no track of their 'pallets' our client could not judge the time taken for the product to reach the customer (dealer, in their case), it was very hard to do any type of real-time analysis and make sudden decisions as they lacked the data for that kind of analysis. Our client was in need of software which could provide them with real-time analysis.

## ASSET INFINITY SOLUTION

- For an organization to make judgement they must have a set of data to work on. Our client had no real-time view of what was happening with their 'Pallets' and for this they needed real-time software which could track 'Pallets' for them.
- We did provide them with automated software which helped them keep an accurate track and take guided decisions.

## LEGACY STATUS

With all the 'Pallets' on go, it was very difficult for the client to keep track of their pallet and then to audit them on a time-to-time basis. Manual Auditing takes a lot of effort, time, and money. The need was for an automated solution that does Auditing for the client and helps them keep an accurate track of all the assets that they own.

## ASSET INFINITY SOLUTION

- When the assets are moving all the time, it becomes very hard to keep track of all the assets. We helped our client by providing them with software which audits 'pallets' for them on a time-to-time basis.
- By this now they have a complete track of all their assets, and they can now save the money that they were investing in by manually tracking the assets.

## CONCLUSION

- Asset Infinity's Asset Management Software was synced with the internal data of the organization which the client then used for better understanding of the data available to them and then to use it to its fullest.
- The client now has a complete view of the assets on move.
- Complete visibility of the assets provided them with a comprehensive look of all the assets.
- The client was able to reduce the theft/misplacement of their 'pallets' since they started keeping a track of them, keeping in mind how valuable they are it was important to have a good hold on all of them.
