For information concerning Condition of Sales, Warranty, Fabric, Finishes, etc., please download the *Conditions of Sales.pdf* on the Davis web site: www.davisfurniture.com

FEATURES

SOLID WOOD	Tops are constructed of solid wood glued boards – only the most attractive sections of the timber are processed to the highest quality standards.
Characteristics	Every tree is a unique creation of nature, so that the color, shade, and structure may well differ from one item of furniture to the next. An item of furniture in solid wood reveals the character and history of a mature tree that may have been 50 to 100 years old: small knots, variations in the growth pattern, and fine cracks caused by the wind are natural features of genuine solid wood furniture. The underside of the table differs from the top, since individual planks are positioned with any knots or less desirable grain effects concealed.
Temperature Caution	Solid wood is a living product, so that slight surface irregularities are to be regarded as normal when the climate changes (i.e. when the room is heated or when the summer is cool and wet). The optimal atmospheric humidity, summer and winter, is approximately 55%. Electrical equipment that generates heat, such as computers, lamp transformers, etc., must not be placed directly on a solid wood surface. Their heat dries out the wood excessively at the contact area, and may cause it to split.
Solid Wood Selections	Standard offering is Oak and American Walnut. Other species of wood are subject to availability and construction requirements - contact Factory with wood desired - will require additional lead time
Oak	-OASW Oak's color scale ranges from yellowish-brown to mid-brown. It is a very hard and durable wood.
Walnut	-WWSW American walnut's heartwood is chocolate to violet-brown in color.
Surface Finishes	Tops are standard with a clear lacquer finish – a natural linseed oil finish may be specified at no upcharge
Lacquer	Standard is a clear coat of lacquer that is applied to the raw wood to enhance the natural characteristic of the wood and add a protective coating.
Linseed Oil	Optional Finish - Brace-Oiled Finish - A natural linseed oil is applied in several coats on raw wood – SPECIFY AT TIME OF ORDER This finish will have to be reapplied as it dries out on the product - so extended care is necessary Initial order with this finish has a touch-up kit included - for oil replacement purchase locally boiled linseed oil
Legs	Legs are solid wood, or 3/8" bent steel.
Custom	Brace is always built individually to order, so that suitable special dimensions may be chosen for all items. For special projects, please consult the factory in advance – we will gladly provide the necessary support for your space and product planning
Edge Detail	See below for the edge detail. The standard corner edge will be a 5cm radius.
	Veneer Top Solid Wood Top Fenix Top
Tops	Veneer Top - MDF with corner edge. Solid Wood Top - solid Oak or Walnut with soft corner edge FENIX™ Top - All FENIX™ tops are edge banded with a matching ABS edge band
Access Lid	If electrical is ordered all access lids will come standard in matching top material.
