FEATURES

All tops are 1⁵/₈" (4 cm) thick

SOLID WOOD	Tops and cases are constructed of solid wood glued boards – only the most attractive sections of the timber are processed to the highest quality standards.	
Characteristics	One should not forget, however, that every tree is a unique creation of nature, so that the color, shade, and structure may well differ from one item of furniture to the next. An item of furniture in solid wood reveals the character and history of a mature tree that may have been 50 to 100 years old: small knots, variations in the growth pattern, and fine cracks caused by the wind are natural features of genuine solid wood furniture. The underside of the table differs from the top, since individual planks are positioned with any knots or less desirable grain effects concealed.	
Temperature Caution	Solid wood is a living product, so that slight surface irregularities are to be regarded as normal when the climate changes (i.e. when the room is heated or when the summer is cool and wet). The optimal atmospheric humidity, summer and winter, is approximately 55%. Electrical equipment that generates heat, such as computers, lamp transformers, etc., must not be placed directly on a solid wood surface. Their heat dries out the wood excessively at the contact area, and may cause it to split. Use the "Alucobond" underlay (page 12) in such cases. Sideboards, Highboards, and slideboards constructed of painted MDF are suggested to be used when placing equipment inside.	
Solid Wood Selections	Standard offering is Elm, Sycamore, and American Walnut. Other species of wood are subject to availability and construction requirements - contact Factory with wood desired - will require additional lead time	
Elm	-EE	The heartwood of the elm has a brown to slightly reddish coloring. The growth rings are a prominent visual feature. The sapwood is much paler, and it is this contrast that gives the wood its strong textured effect.
Oak	-OA	Oak's color scale ranges from yellowish-brown to mid-brown. It is a very hard and durable wood.
Sycamore	-SS	The sycamore is steam-treated, which brings out its warm, reddish color. Alternating lighter and darker areas with a calm, strongly linear grain pattern make this wood unique and unmistakable.
Walnut	-WW	American walnut's heartwood is chocolate to violet-brown in color, with a darker overall effect than is obtained with European walnut.
Surface Finishes	<p>TIX is available in several surface treatments according to item. These surfaces are applied to protect the wood against dirt. A decision on the advantages and disadvantages of a particular surface treatment has to be taken individually and will also depend on the customer's personal views and preferences. There are practical considerations such as the amount of effort that has to be devoted to subsequent care, but also more subjective factors such as a pleasant "feel", the visual effect of the wood surface and the patina. It is important to consider all of these aspects of surface treatment before a final decision is made.</p> <p>Tops are standard with a clear lacquer finish – a natural linseed oil finish may be specified at no upcharge Cases are standard in the clear lacquer or three painted finishes are offered for a lower price point – natural linseed oil finish may be specified at no upcharge</p>	
Lacquer	<p>Standard is a clear coat of lacquer that is applied to the raw wood to enhance the natural characteristic of the wood and add a protective coating.</p> <p>No stains are available on any wood species – coloration is arrived by using different types of wood</p>	
Linseed Oil	<p>Optional Finish - TIX-Oiled Finish - A natural linseed oil is applied in several coats on raw wood – SPECIFY AT TIME OF ORDER This finish will have to be reapplied as it dries out on the product - so extended care is necessary Initial order with this finish has a touch-up kit included - for oil replacement purchase locally boiled linseed oil</p>	
Paints	-PT	<p>Available only on cases – Satin matte paint finish on MDF or chipboard as a backing material – at a lower price point Two-component polyurethane paint, light-fast and non-marking Specify color at time of order – TIX-Snow White, TIX-Black, TIX-Deep Grey</p>
Legs	<p>TIX is available with different leg designs:</p> <p>"T" and "X" legs - anodized, extruded aluminum - available on desks "I" legs - steel panels - silver powder coat on steel ONLY - available on conference tables "I" legs - brushed aluminum panels - available on rectangle desks, sideboard, highboards, slideboards, and benches "I" legs - wood leg and connector to replace aluminum</p>	
Positioning	The legs/bases are positioned in the workshop in such a way that the stability and overall appearance match the size of the table – positions of legs as standard are shown throughout price list. However, the customer can also specify how the bases and legs should be positioned, for example to make allowance for the number and size of chairs or floor power/data monuments.	
Aluminum	Drawer fronts and back panels on cases are of solid aluminum with a brushed surface and a natural anodized finish Optional veneer covered aluminum drawer & door fronts are available, contact factory	
Locks	Cases have central barrel-type locking and are standard on all with standard lock locations – refer to individual item in price list Locks may be keyed alike – MUST BE SPECIFIED AT TIME OF ORDER	
Custom	TIX is always built individually to order, so that suitable special dimensions may be chosen for all items from a small console to a 50-person conference table. For special projects, please consult the factory in advance – we will gladly provide the necessary support for your space and product planning	

Two-piece Desk (Work/Meet), Base Case with Electrical Connection, and Highboard

ELM Solid Wood

OAK Solid Wood

SYCAMORE Solid Wood

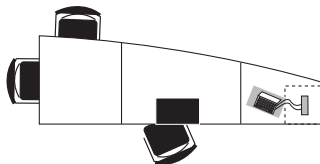

WALNUT Solid Wood

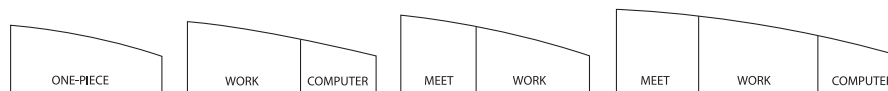

Single Conference Table with small Tray Panel, and Highboard

DESK FEATURES **All tops are 1 5/8" (4 cm) thick**

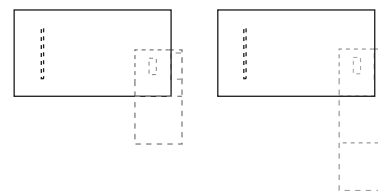

Concept This furniture system takes the key elements of the office environment and incorporates them into a single functional statement rather than separate units. The personal desk can now be linked to a meeting and/or a data processing table on either side. Distinct areas of function are designed into the desks – Meet, Work, and Computer

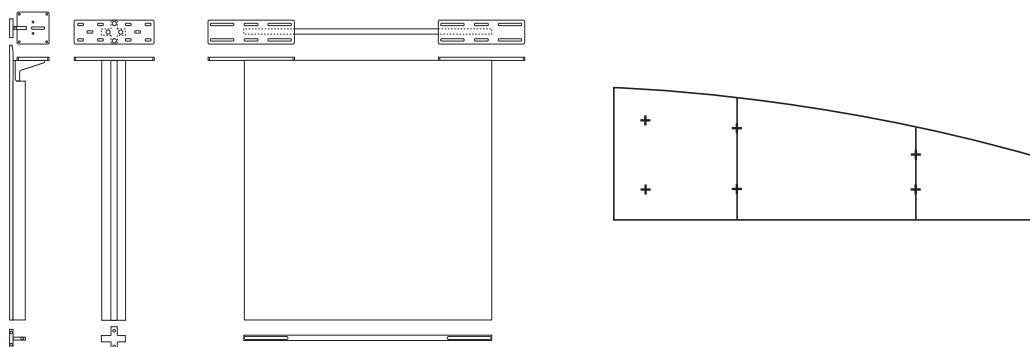

Wedge Shape The wedge-shaped design of the tables has an inherent design that creates, even in the single top, a meeting, working, and computer support area. The gentle curve of the top aesthetically makes a statement, while creating the narrow top end that is typically used for the computer support. Desks are standard with "X" legs on large end and connecting tops, and "T" legs on short wedge end. As standard offering the wedge desks may be ordered as follows: all legs, base case on computer end, return on computer end, and lowboard on computer end

Rectangle Rectangular tops were created to connect to Lowboards for additional computer support including a pull-out printer shelf. These tops are standard with the "I" legs and may connect right or left

Legs TIX is available with different leg designs:
 "T" and "X" legs - anodized, extruded aluminum - available on desks
 "I" legs - steel panels - silver powder coat on steel - available on rectangle desks, conference tables, sideboard, highboards, slideboards, and mediaboards
 "J" legs - wood panels - available on desks and conference tables.

Positioning The legs/bases are positioned in the workshop in such a way that the stability and overall appearance match the size of the table – positions of legs as standard are shown throughout price list. However, the customer can also specify how the bases and legs should be positioned, for example to make allowance for the number and size of chairs or floor power/data monuments. Alternate legs may be considered.

Woods & Finishes Standard offering is Elm -**EE**, Oak -**OA**, Sycamore -**SS**, and American Walnut -**WW**. Other species of wood are subject to availability and construction requirements - contact Factory with wood desired - will require additional lead time. Lacquer finish standard – Optional finish: **TIX- Oiled Finish** - specify at time of order

Custom All TIX desks have a Custom Model Number that can be used when ordering a different size or shape from the standard offering. Quotation request for customs should be forwarded to the factory. Lead time will vary according to complexity of special

Two-piece Desk (Work/Meet) and Base Case with Electrical Connection

Rectangle Desk with three module Lowboard

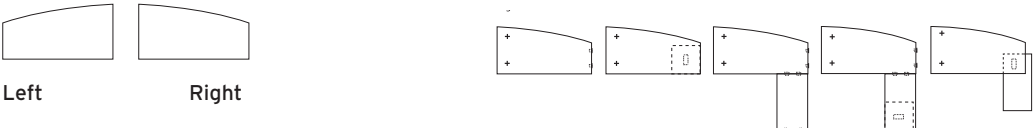

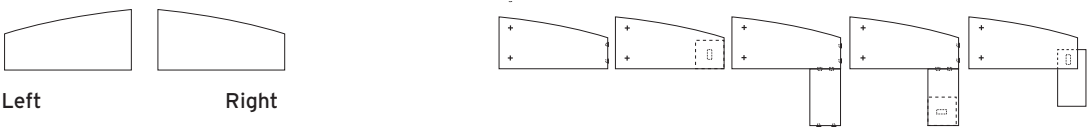

Two-piece Wedge Desk with Return Top and non-connected Base Case (note: "T" legs will be moved to this position when floating Base Case is used)

CONFERENCE TABLE FEATURES **All tops are 1 5/8" (4 cm) thick**

Concept Rectangular Conference Tables are designed with center joint line lengthwise of a two-piece solid wood top. The center joint line is a design feature that emphasizes the length of the rectangle and also allows the base to be seen through the table top. This joint, however, has an interesting additional function.
It provides innovative options for electrical wiring and power sockets. The joint line can be opened and closed by separating the two halves of the table to drop wires into the optional cable trough.

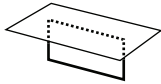

Legs "I" legs - steel panels - silver powder coat on steel standard / Wood legs are available on desks and conference tables
 Single Table - standard with two "I" legs
 Double Table - standard with two "I" legs and center leg has larger leg that offers wire management down both sides of leg - both panels may be removed to access wires

Positioning The legs/bases are positioned in the workshop in such a way that the stability and overall appearance match the size of the table – positions of legs as standard are shown throughout the price list. However, the customer can also specify how the bases and legs should be positioned, for example to make allowance for the number and size of chairs or floor power/data monuments.

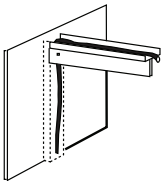

Woods & Finishes Standard offering is Elm -**EE**, Oak -**OA**, Sycamore -**SS**, and American Walnut -**WW**.
Other species of wood are subject to availability and construction requirements - contact Factory with wood desired - will require additional lead time.
Lacquer finish standard – Optional finish: **TIX- Oiled Finish** - specify at time of order

Custom All TIX desks have a Custom Model Number that can be used when ordering a different size or shape from the standard offering
Quotation request for customs should be forwarded to the factory
Lead time will vary according to complexity of special

Accessories Several accessory items are available –

TIX-8100-TP1 Tray Panel/Small - aluminum tray that slides in center joint to hold small items - 21 5/8 (55) L x 6 (15) D x 2 3/4 (7) H - at **\$1298** List

TIX-8200-CDH Cable Duct - horizontal - 51 1/4 (130) L x 6 1/4 (16) D x 2 (5) H - at **\$1166** List

TIX-8260-CDH Cable Duct - horizontal - 55 1/8 (140) L x 6 1/4 (16) D x 2 (5) H - at **\$1166** List

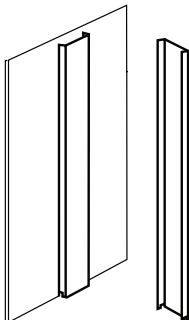

TIX-8320-CDH Cable Duct - horizontal - 63 (160) L x 6 1/4 (16) D x 2 (5) H - at **\$2073** List

TIX-8400-CDH Cable Duct - horizontal - two pieces - 51 1/4 (130) L x 6 1/4 (16) D x 2 (5) H - at **\$2331** List

TIX-8520-CDH Cable Duct - horizontal - two pieces - 55 1/8 (140) L x 6 1/4 (16) D x 2 (5) H - at **\$2331** List

TIX-8640-CDH Cable Duct - horizontal - two pieces - 63 (160) L x 6 1/4 (16) D x 2 (5) H - at **\$4148** List

Wire management tray in silver powder coated steel - placed between legs - order by table length
Use Cable Duct - vertical to feed wires to floor - see below

TIX-8100-CDV Cable Duct - vertical - at **\$890** List

Wire management vertical trough connects to inside of leg - 6 3/8 (16) W x 2 (5) D x 25 1/4 (64) H
Silver powder coated steel to match leg

TIX-8100-PB Plug Box - aluminum box with two power plugs and two RJ45 data ports each side - 11 3/4 (30) L x 3 1/4 (8) D x 3 (8) H - at **\$2842** List

Slides in center joint of conference table - tables open up to place plug through

Should specify at least the Cable Duct - vertical to manage wires to floor and preferably Cable Duct - horizontal for management across top

Recessed power boxes or trough power / wire management are available. Contact factory
