

Letter of Support

To Whom It May Concern:

During my tenure as Licensing & Certification supervisor for the TN Department of Agriculture (TDA) I had the opportunity to review a number of software vendors offering on-line testing. Everblue stands out among the crowd.

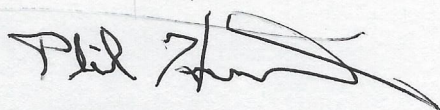

The Everblue platform was simple and easy to work with. They really know their product and got our exams up and running faster than other competitors forecast.

Compared to other vendors, the things that stood out about Everblue were that they were great communicators, fast, and competent. I had access to the entire team. Collaboration was key to exam design and implementation.

Best of all, they perform these things on timelines without delays. Experiences with other vendors often resulted in unreturned emails or phone calls, let alone solve any problems in a timely manner.

Everblue is a great organization full of smart, honest, and hardworking people. I highly recommend working with them.

If you have any questions, I am available at a1hurst@bellsouth.net.
