

It's time for better plans

Smart Workforce Planning Solutions

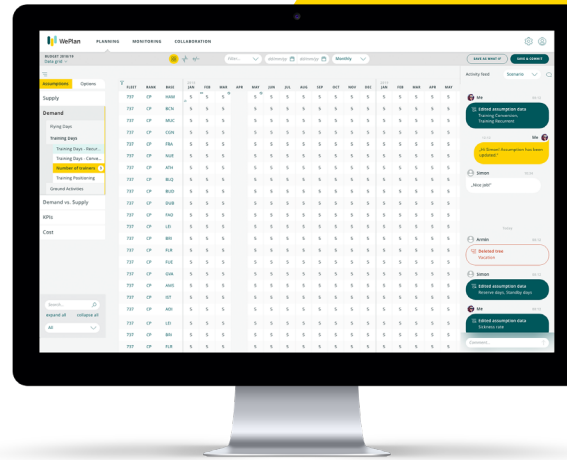

Make Plans, Not Spreadsheets

Workforce Planning can be challenging

Finding the right workforce planning solution for your current and future requirements is not easy. Delivering and steering resource capacity has become more and more challenging due to the ever-growing complexity of today's handling operations.

Reality shows, planners spend most of their time on chasing information and copying data from one source to another instead of being able to actually analyze the outcome. They rely on historically grown spreadsheets or complex planning systems which further increases the risk of mistakes being made and limits them in their planning flexibility.

Transparency and flexibility in shift planning are also key factors for employee retention. Your employees are already informally involved in shift scheduling, but likely not in a sustainable and easy way. Changing that with a digital solution can increase their satisfaction with planning by 40% and lead to higher employee advocacy.

WePlan gives you

- a clean and intuitive web-based user interface
- collaboration and transparency over who did what
- automated shift bidding and planning
- duty analytics and automated reporting
- optimisation of absence- and shift-planning

The WePlan Solution

Future-proof your way of working

At WePlan we not only support our clients in creating the ideal resource plan. Our ambition is to provide an intuitive solution that is fun to work with, enables planners to focus on the work that really creates value and increases employee retention through increased flexibility and staff happiness.

That's why WePlan is much more than a clever workforce planning software. Designed to adapt with our fast-paced world, it gives you reliable, transparent

insights at the touch of a button, allowing you to quickly change course whenever you need to. WePlan encourages collaboration, increases employee satisfaction and ensures the necessary agility and planning power.

Our mission is to build software that evolves with the way you work, so you have the tools you need to take on tomorrow's challenges.

Roster Sharing

Three Steps to Success

3. Uncover True Potential

- Ensure agility and assess demand changes within seconds
- Plan for the future with what-if scenarios
- Master complexity through fully automated planning and bidding
- Ensure continuous planning improvement through Roster Analytics & AI

2. Improve Quality of Work

- Track & understand changes
- Collaborate across teams for streamlined data collection
- Overcome planning silos and dependence on single individuals
- Include your workforce in the process by letting them bid & swap shifts

1. Fix the Basics

- Eliminate the Excel-Chaos and do end-2-end planning in one tool
- Overcome data modelling limits through increased flexibility
- Get better insights through ready-to-go reporting dashboards

A Big Plan at Small Costs

Value for Money

Our structure allows for an easy integration and adoption of the tool without high costs for changes.

Industry Knowhow

We have extensive experience in planning in the TT&L industry and understand your challenges.

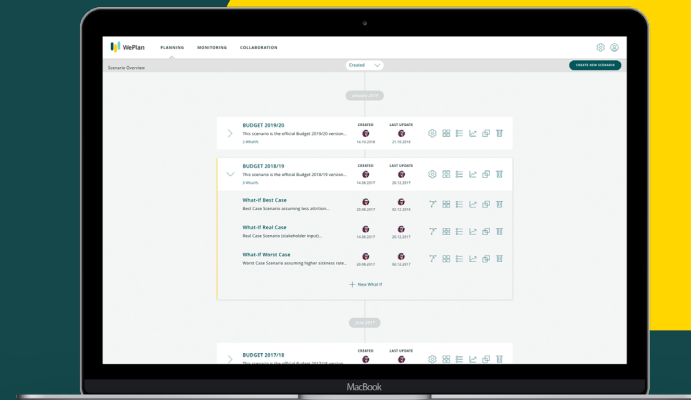

Business Support

WePlan offers business support to optimally migrate our tool and ensure a smooth transition.
