Veolia North America has led the charge to in-house discovery since 2013. As the world’s leading provider of environmental solutions, Veolia is on the ground in more than 550 communities across North America, using their understanding of the complex relationship between water, waste and energy to solve environmental challenges and help customers reach their goals. When litigation arises, it can be long-running and data-intensive, but thanks to Logikcull’s Instant Discovery, Veolia can handle even the most challenging matters in house.

As a recent case study with Logikcull shows, Veolia North America’s approach to in-house discovery has led to dramatic cost savings and radical reductions in the number of documents requiring outside counsel review. And these improvements do not require a massive in-house team. In fact, the project was accomplished with just one employee leading the charge, Veolia North America’s Director of Legal Support, Katie Lynch.

$258,250 saved by eliminating hosting costs alone
99.4% reduction in data requiring OC review
100K+ review hours eliminated

HOSTING FEES THREATEN TO BUST THE BUDGET

In 2015, Veolia North America faced a contract dispute with records stretching back over 20 years. With 1.49 terabytes of data to review, redact, cull, and produce, the legal team faced a potentially budget-destroying discovery process. With a traditional vendor model, line items like processing, project management, and tech time could quickly add up, while the cost of hosting that data...
**Problems**

**REVIEW COSTS CAN’T KEEP PACE WITH GROWING DATA SIZE**

Though hosting fees, processing costs, and vendor line items can quickly add up, review is where the true costs lie. As data and document sizes continue to expand, those costs are becoming increasingly unsupportable. In this one matter, the document corpus at issue included 5.5 million documents and 30,948,788 pages. Manual review would have cost millions; TAR would have taken months just to set up and required a large reviewer set. Veolia needed a way to quickly cull down their data and drastically reduce the number of documents requiring outside counsel review.

**Manual Review Costs:**
Assuming $350 hourly rate for outside counsel review and a 50-document-per-hour review rate

\[(5,500,000/50) \times \$350 = \$38,500,000\]

Assuming a 50% cull rate before review: \$19,250,000 for manual review

---

**Solutions**

**DEDUPLICATION AND CULLING INTELLIGENCE SLASHES REVIEW COSTS**

When Veolia loads documents into Logikcull, they are automatically processed and deduplicated. Automatic deduplication alone was able to dramatically cut down the number of documents Veolia faced, reducing the data by more than half. From there, Lynch was then able to apply Logikcull’s Culling Intelligence to quickly focus in on the relevant documents. Keyword search then reduced the data set further. In the end, only 14,826 docs, 359,000 pages, and 9 GB of data were produced to outside counsel for review, a reduction of 99.4%.

**Before Logikcull:**
- 1.49 TB
- 5.5 million docs
- 30,948,788 pages

**After ECA in Logikcull:**
- 9 GB
- 14,826 docs
- 359,000 pages

**Reduction:**
- 99.4%
- 99.8%
- 98.9%

“Any time we can cut down outside review, we’re going to see big savings.”

Katie Lynch, Director of Legal Support, Veolia
Handling Massive Projects In House, Without a Massive Team

Veolia North America was able to meet its obligations while dramatically reducing costs, all with a small, agile team.

Facing 1.49 terabytes of data and short case deadlines, Veolia North America was able to meet its obligations while dramatically reducing costs, all with a small, agile team. IT teams helped with data collection, but “in terms of the legal team, this was all handled by me,” Veolia North America’s Director of Legal Support Katie Lynch explains.

The efficiency Veolia achieved even helped in negotiations with counsel. “The usual objection is that they always want to see everything,” Lynch says. “To which I ask, ‘what would your approach to 5.5 million docs be?’ Then we start to collaborate to narrow the universe of documents.” And since Lynch has been able to build valuable in-house experience, she often knows just where to look to get the data that matters.

With Logikcull, Veolia North America can gain instant insights into that data: automatic categorization provides an immediate overview of the document corpus, bulk keyword search allows users to quickly ascertain the number of documents that will hit for a large range of search queries, and potential privilege detection enables the team to focus in on some of the most urgent communications instantly.

With Logikcull, Veolia’s legal team can stay agile and effective, while handling matters that others would balk at—and to dramatically cut costs at the same time.
