

Press Release

Lübeck, 26 April 2023

BAADER Sells Salmon Line to Skagerak Processing A/S

The new salmon processing line will be delivered at the end of June and is planned to be up and running by end of July 2023. With this purchase, both salmon processing lines at Skagerak Processing A/S will be run by BAADER equipment.

“We wish to be the customers’ preferred supplier in the global market for value-added fresh and frozen salmon products. As such, we continuously test the best possible solutions and keep investing in our plant”, says Bård Sekkingstad, Owner of Sekkingstad AS. “Based on our research and experience we have chosen the salmon line from BAADER because it will guarantee us a reliable performance and most of all high yield.”

“This sale is a great example of long-lasting customer relationships”, says Robert Focke, Managing Director BAADER. “Skagerak Processing A/S was one of the first to purchase a BAADER 581, we are happy to now integrate the updated version of the salmon filleting machine, the BAADER 581 Pro, in their new salmon line.”

The relationship between Skagerak Processing A/S and BAADER dates to 2008 when the Danish fish processor installed its first salmon line. Two years later, they added the BAADER 581. With the purchase of the new salmon line, both processing lines will be operated with BAADER machines. The new line covers the processing line from heading, filleting, trimming, and pin boning.
