# ENVIRONMENTALLY FRIENDLY PRACTICES

**INCORPORATED SUSTAINABLE PRACTICES  
(Since 2013)**

**GREEN SURROUNDINGS**

**WASTE MANAGEMENT**

**ENERGY SAVING**

**FOOD MANAGEMENT**

**SAVE WATER**

**REUSE RECYCLE REDUCE**

# GREEN SURROUNDINGS

45,000 sqm greenery landscape

Diversity of tropical species plants

Conserving native plants

## ENERGY SAVING

Strategic layout to incorporate natural lighting into the building

Double skin façade for enhanced passive cooling

24° AC temperature - will be adjusted due to weather conditions

LED lighting system

Elevator for delegates with disability

## ECO FRIENDLY FOOD MANAGEMENT

Use of fresh, local and seasonal ingredients

Use of home grown herbs and tropical fruits

Overstock food donated to the local foundations

## SAVE WATER

Automatic infrared sensor touchless faucet

Graywater for watering garden plants

Reverse Osmosis water treatment system

Use of water dispenser and pouring water

# WASTE MANAGEMENT

Garden waste recycled into compost

Selected organic waste donated to local farm for livestock feed

Selected organic waste turns into eco enzyme

Reduce the use of papers and plastics especially in food & beverage serving; in events & internal office activities

Separate dustbins for recyclable waste

Temporary storage of hazardous and toxic substances to be collected periodically by certified hazardous waste management services

A small, realistic-looking globe of the Earth is positioned in the center of the frame. It is resting on a large, vibrant green leaf that fills most of the background. The leaf's veins are clearly visible, and the overall lighting is soft and natural, suggesting an outdoor setting. The globe shows continents in light brown and green, and oceans in deep blue. A bright white spot is visible on the globe's surface, possibly representing a reflection or a specific location.

**Environmental sustainability is an ongoing process of continuous improvement, it is our responsibility to create and maximize sustainable business events**
