Yahoo! Inc. ([YHOO](#)) Chief Executive Officer Marissa Mayer, by ordering staff to report to offices, has reinvigorated debate over the merits of giving employees more flexible working arrangements.

Jackie Reses, Yahoo's executive vice president of people and development, sent a memo last week asking employees with work-from-home arrangements to make their way to company offices, starting June. Being side by side fosters collaboration and improves work "speed and quality," she wrote.

The message resonated with academics who say opportunities to work together can bolster morale while sparking creativity. Even so, research suggests that at-home arrangements can make self starters more productive and help managers attract employees who seek flexibility in how they complete tasks.

When Working From Home Works

WFH Works Best

Relatively Independent Tasks

Sharing Explicit Knowledge

Costs of Co-Locating Are High

Face to Face Works Best

Highly Interdependent Tasks

Sharing Tacit Knowledge

Costs of Co-Locating Are Low

A Simple Recipe for Leading in a Crisis

Aim High

★ Team Up

Fail Well

Learn Fast

Repeat

Teaming is a Verb

team • ing (v.)

Teaming is teamwork on the fly—coordinating and collaborating, across boundaries, without the luxury of stable team structures

 Teaming is especially needed when working in a crisis

**What's been hard about leading
your teams during COVID-19?**

Elements of Effective Teaming

1 Hardware

2 Software

Elements of Effective Teaming

1 Hardware

- **Scoping** Tentative goals & resources
- **Structuring** Clarify interfaces for coordination
- **Sorting** Prioritize “Reciprocal” Tasks

Teaming in a Crisis

- You face many **UNKNOWNNS**
- You have to bring in different **EXPERTISE** at different times.
- You **LACK** fixed roles and deliverables
- You often have to do things that have **NEVER** been done before
- You have to **ACT** – to learn
- It's **AGILE**, iterative and fraught with challenges...

Elements of Effective Teaming

2

Software

- Purpose
- Psychological Safety
- Empathy

What's at Stake

For Voice

Consider others' views & needs

Psychological safety

A belief that the context is safe for speaking up with ideas, questions, concerns, or failures – confidence that your voice will be valued.

Think of it as felt permission for candor.

Psychological Safety Is Not:

- x** Being nice
- x** Freedom from conflict
- x** A guarantee that all your ideas will be applauded
- x** Permission to slack off
- x** A license to whine
- x** Oversharing
- x** *The Goal...*

Failures of Courage? Or a Failure of Leadership?

©Cartoonbank.com

Consider the different kinds of work your teams do:

**Routine
Operations**

**Complex
Operations**

**Innovation
Operations**

As uncertainty increases, psychological safety is more and more important to success...

Urgency + Psychological Safety → Problem-Solving

Fear that is shared is productive

Interpersonal Fear at Work

Subtle/Hidden

Experienced Alone

Concerned with What Others Think

Inhibits Innovation

Fear Related to COVID-19

Obvious/Explicit

A Shared Experience

Concerned with What We Can Do

Promotes Innovation

To the extent that your people have felt more comfortable than usual expressing their concerns and questions, how will you keep that transparency and vulnerability alive in the future?

As a city leader, have you made any changes in your approach to leading teams during this crisis?

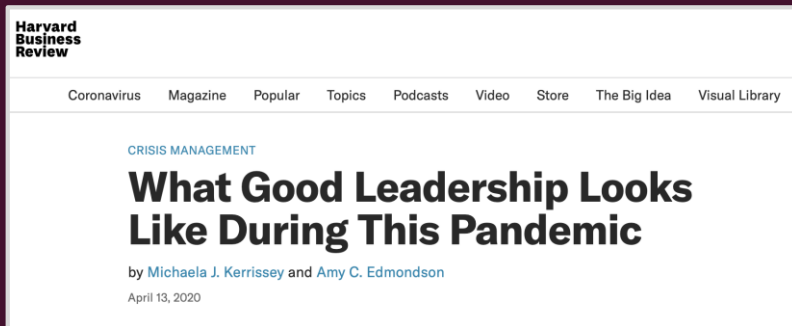

If so, what are you doing differently now, and why?

You don't have
this luxury!

Overcoming Instincts to Lead Effectively

Human instincts, combined with management training, lead us to the wrong approach in a crisis.

What's *instinctive* when facing uncertainty

Waiting for additional information

Downplaying the threat and withholding bad news

Doubling down to explain your actions more clearly

Staying the course

What's *needed* in a crisis

Acting quickly on what you know

Communicating with transparency

Taking responsibility and focusing on solving problems

Engaging in constant updating

*What will we wear to the
future we create?*

We are called to
be architects of
the future, not its
victims.
