

Work Matta™ Grit

Work Matta™ Grit is a maximum grip, durable, slip-resistant surface finish that can be applied to a wide range of Work Matta™ tiles.

Work Matta™ Grit tiles perform well in conditions where sure footing is paramount and safety may be compromised by slopes, fluids, dampness or industrial overspray.

The Grit finish can be applied to the Work Matta™ Comfort, Excel and Ergo range. All safety tiles retain the ergonomic benefits with the additional advantage of a high-traction silicon carbide surface. The Grit surface isn't sprinkled on either — it's a category leading finish.

WORK MATTA™

Work Matta™ Grit tile is the perfect solution for:

MANUFACTURING

Comfort Edge Ramp SF	100 x 500mm	630g
Comfort Edge Ramp MM	100 x 600mm	785g
Comfort Edge Ramp MF	100 x 600mm	725g

FAQs

WHAT ARE WORK MATTA™ GRIT TILES MADE FROM?

The Work Matta™ Grit finish can be applied to the Excel and Comfort range of products, which are made from either recycled or virgin PVC (depending on application). The Grit finish is a lathered silicon carbide product which is baked on to the surface using specialised heating tracks.

ARE GRIT TILES RESISTANT TO CHEMICALS AND OILS?

Yes, Work Matta™ Grit tiles are resistant to most common chemicals, oils, fluids and greases. If you have a specific chemical you are using onsite that you have concerns about, please contact us. We're happy to discuss.

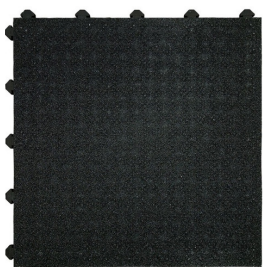

DO WORK MATTA™ GRIT TILES WEAR OUT?

Like all flooring products, the Work Matta™ Grit surface will wear out in time under heavy use. We're confident, however, that the Work Matta™ Grit finish is category-leading and will outlast all competition.
