

SUPPLEMENT PELLET

AIM

CONVERTER Beef 25 (PT)

Method

To Be Mixed With Grain

Dose Rate

Cattle: 25 Kgs Per Tonne Finished Feed

Unit Size

25 Kg or 1,000 Kg Bulk Bag

GRAIN FEEDING MANAGEMENT

For Cattle & Sheep. Grain or grain based rations for beef feeding often lack the sophisticated nutrient profile required to optimise animal growth, health and feed efficiency, leading to significantly reduced returns from either feedlot or supplementary feeding programs. Designed by Australian experts for Australian conditions, Converter Beef 25 is a concentrated supplement pellet containing an advanced blend of Macro & Micro minerals, Vitamins, Buffers and Rumen Modifiers engineered for ready inclusion into high performance feedlot or supplementary diets.

CONVERTER Beef 25 (PT)

FAQ'S

How much Converter Beef 25 Pellet do I use? The Pellet is designed to be included in a well-formulated feedlot diet at the rate of 25 kgs per tonne of finished feed or 250 grams per head per day. To optimise the productive benefit, we suggest you speak to an Accredited A.I.M. Advisor to obtain advice in relation to formulating the complete ration.

How do I mix the Pellet with grain? The most effective way to mix Converter with grain is via a vertical paddle or ribbon mixer. This will ensure even distribution of the Pellet through the mix. If you don't have a mixer, adding Converter Beef 25 at a proportional rate to grain as it is being augered can often be quite successful, however care and diligence is required in order to ensure even distribution.

Does Converter Beef 25 contain products which limit/prevent grain poisoning? Yes. Converter Beef 25 Pellet contains Buffers - compounds that help to control or prevent Acidosis. However due care during Feedlot Induction and Feeding is a critical part of managing the risk associated with Acidosis.

When do I use the Pellet? The Pellet has several applications. The first of these is in Cattle Feedlot diets. The Pellet is also valuable as a component of supplementary trail or bin feeding.

Can I add other additives to the grain ration whilst using Converter Beef 25 Pellet? Yes, but this is usually completely unnecessary and may often reduce the effectiveness of the Pellet by upsetting the nutrient balance it contains. We strongly suggest that you discuss your options with an Accredited A.I.M. Advisor before proceeding with including additional additives to the grain diet.

Can I include Converter Beef 25 Pellet in the grain I use to feed calves before they enter the feedlot? Yes. Pre-adapting calves to both the grain and the mineral and buffers contained in Converter Beef 25 is a great idea. This should be included at the full rate of 250 grams per head per day.

A concentrated, carefully balanced Pellet formulation for ready inclusion in high and low grain content Beef feedlot diets and supplementary feeding rations. Contains Monensin Sodium and an Advanced Buffer Complex.

Composition Nutrient Sources

Vitamins and/or Vitamin Precursors, Inorganic Minerals and/or Mineral Chelates, Vegetable Proteins and/or Amino Acids, Salt, Vegetable Oil and/or Molasses, Cereal Grains, Starches and/or Di- and/or Polysaccharides.

Nutrient Profile

Macro Minerals	Calcium, Magnesium, Phosphorous, Potassium, Sodium, Sulphur.
Trace Elements	Cobalt, Copper, Iodine, Manganese, Selenium, Zinc.
Vitamins	Vitamins A, D, E and B Group, plus advanced forms of Vitamins A, D, E, Biotin, B5, B6 and Folic Acid.
Other	Monensin Sodium, Buffer Complex.

Calculated Analysis (M.F.)
