

OUR RENTALS ARRIVE ON TIME AND READY TO GO.

Unlike other rental companies, our rental and fleet operations are powered by T3, a digitally connected platform, to give customers a streamlined rental experience that helps them build with control. Say goodbye to the days of hoarding a yard full of unused equipment, or wondering if the equipment has been properly maintained.

With more than 100 rental locations around the country and growing, builders have access to affordable next-generation machines — each one with tech hardware that can track and store vehicle health and usage data.

Equipment from the brands you know and trust.

"I use EquipmentShare's technology every day. I can make decisions just by looking at the tracking technology and utilization: If that machine hasn't been operated in a few days, then we can off-rent that one. I can see the idle time or tell if there's a problem. By using the technology, I can pinpoint which machine is causing problems and ask questions to the team in the field or request some service for that machine. That helps us avoid emergencies and prevent breakdowns. I can see what the machine is working on, where it's going and which facility it's on from states away."

Shawn Wildt, Purchasing Agent at Flash Trucking and South Texas Frac

Best Rental Experience

- Rent equipment when you need it. Off-rent it when you don't.
- Create geofencing and utilization reports to control your jobsite and rental spend.
- Reduce theft and unauthorized use with our GPS and access keypads which let you know where your machines are at all times and who's using them.
- Know when your rental machine leaves our yard and when it's on its way to yours.
- Our service team and tech can use our T3 tech to quickly and easily mitigate repairs and reduce downtime.

Tech + Team = Best in the Business

Our dedicated rental and service teams use T3 technology to help you prevent machine breakdowns, off-rent idle equipment and identify ways to save money.

We know. It's not what you expect from an equipment rental company. It's better.
