

The B6 seat is supplied either bottom or side mounted. To fit Tillett adjustment runners to the bottom mounted version, you would need the TK5 fitting kit, as the runners have to be spaced away from the lower seat surface.

The side mount version can use brackets PTBi, PTBO, TBFIA, STBi, STBO, and Elise brackets EBR, EBR 17+, EBS, EBP. These brackets have a 2° from vertical angle, which matches the side of the seat. Brackets which do not match this angle will unduly stress the composite.

## B6 Dimensions 2022 model

### B6-40 carbon GRP side mount

### B6-44 GRP side mount

For the FIA 8855-1999 homologated version order the B6 Screamer.

## B6 XL Dimensions

The B6 XL is supplied with either bottom or side mounted captive M8 fittings. To fit PTRi, PTRO, STRi or STRO Tillett adjustment runners to the base mounted version, you will need the TK5 fitting kit as the runners have to be spaced away from the lower seat surface. The side mount version can use brackets PTBi, PTBO, TBFIA, STBi, STBO, and Elise brackets EBR, EBR 17+, EBS, EBP. These brackets have a 2° from vertical angle, which matches the side of the seat. Brackets which do not match this angle will unduly stress the composite.

For the 8855-1999 homologated FIA version order the B6 XL Screamer.
