

# Web Page Revision for Production Company

## PROJECT DETAILS

 Web design

 Aug. - Sep. 2021

 \$10,000 to \$49,999

*"I was definitely impressed by their eagerness and capabilities in terms of what they can deliver."*

## PROJECT SUMMARY

A production company wanted to update the careers page of their website and implement a new API for their job listings page as well. They partnered with moontek to provide the necessary expertise.

## PROJECT FEEDBACK

The company appreciated how eager the moontek team was to work on the project. The team went above and beyond what the company expected and executed all their tasks flawlessly. As a result, the company will maintain a relationship with the team for future projects.

## The Client

Please describe your company and your position there.

I am a part of the IT Project Management team for a production company within the Entertainment Industry.

## The Challenge

For what projects/services did your company hire moontek?

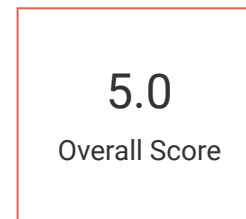

Our website had been revamped a few years back by a third party company. We weren't looking to do an entire redesign of the site, just a particular page within the site. Our careers page was outdated and we were looking to implement a new api for our job listings as well. Moontek was able to help us without hesitation.

 Project Manager,  
MRC Entertainment

 Motion Pictures & Film

 501-1,000 Employees

### CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

### How did you select this vendor and what were the deciding factors?

We weren't looking to do an entire redesign of the site, just a particular page within the site. Due to this, we were having difficulty finding a dev to work on our existing environment, and many suggested a revamp of the site instead of what we were asking for. Moontek without hesitation, were eager and very familiar in the environment our site was built on. They were more than confident in being able to provide exactly what we need in our short deadline.

### Describe the project in detail and walk through the stages of the project.

After reaching out to them through their website, we got an immediate response in setting up the initial meeting to discuss our needs in further detail. Within this meeting, we stressed we were on a short and timely deadline that could not be adjusted. We also indicated our very opinionated stakeholders would like to be involved in every step of the process.

This seemed to be no issue on Moontek's site. They were able to provide mockups, stay organized in working within our deadline, and most importantly, were understanding of our situation and willing to work with us.

### How many resources from the vendor's team worked with you, and what were their positions?

We had Ali who was our main point of contact who also seemed very involved in the project. It was a breath of fresh air to be communicating directly with the person in charge of the project and not through a liason who did not understand the technical aspect.

## The Outcome

Can you share any outcomes from the project that demonstrate progress or success?

Moontek seemed very eager to work on our project and went above and beyond to ensure everything went off flawlessly. They exceeded expectations with the design and execution, in addition to ensuring everything was organized and maintained constant communication with us. This will no doubt result in us maintaining a relationship with Moontek as we continue to expand the company.

How effective was the workflow between your team and theirs?

Communication is key with any project, and the fact that we were able to not only meet multiple times a week to provide updates, but also be able to have almost immediate responses was crucial to this public facing page. Moontek delivered in every way when it came to this. They had no doubt in being able to meet our timeline.

What did you find most impressive or unique about this company?

I was definitely impressed by their eagerness and capabilities in terms of what they can deliver. I was initially impressed with their website as it was a testament of what they are able to create.

Are there any areas for improvement or something they could have done differently?

I would like to see a page on their site as a dedicated portfolio with a small summary on what every projects may have entailed so we can see something similar to what we are requesting.
