

Terms of use for Boost.ai's conversational platform

Boost.ai develops, manufactures, markets and offers subscriptions to its conversational AI platform distributed on a SaaS basis or as an on-premise solution (the "Deliverables").

Customers who subscribe to the Deliverables will be given a non-exclusive, non-assignable, royalty free right to access and use the Deliverables during the time of subscription.

Boost.ai own all rights, title and interest to the Deliverables and any intellectual property rights therein or related to the Deliverables and any further developments thereof. These terms of use do not transfer or convey any right, title or interest in or to the Deliverables.

The customer is not entitled to circumvent the technical limitations, reverse engineer, decompile or disassemble, publish so that others may copy, distribute, rent, lease or lend the Deliverables, use commercial hosting software or grant access to the Deliverables to Boost.ai's competitors. For the sake of clarity, competitors are considered any third party who provides chatbot or virtual assistant software or services.

The customer is responsible for all data and content uploaded or created by the customer in the Deliverables.

Upon termination of subscription to the Deliverables, the customer shall cease all use of the Deliverables and delete all copies in its possession and shall promptly return or delete any other property of Boost.ai in its possession

The Deliverables and implementation of the Deliverables are provided "as-is" and Boost.ai disclaims all warranties, express or implied, including, but not limited to implied warranties of merchantability and fitness for a particular purpose and non-infringement. The Deliverables may be temporarily unavailable for scheduled maintenance or for unscheduled emergency maintenance, either by Boost.ai or by third-party providers.

Boost.ai does not guarantee maintenance and support for software versions older than one year if a new software version has been launched and made available as an update to the customer.
