Electric Vehicle Charging For Businesses & Apartments

About Us

We design, build and install smart electric vehicle charging systems.

Our New Zealand-built charge points and software ensure that vehicles are charged efficiently, affordably, and with the lowest possible impact on both the electricity grid and the environment.

Evnex manages New Zealand's largest network of smart charge points, delivering over 500 charging sessions per day and enabling over one million kilometres of driving per month.

Why Evnex?

We are New Zealand's only vertically integrated EV charging solutions provider. Our world class technology is designed and manufactured right here in Christchurch to ensure that our customers have the best possible experience, and only need to deal with one supplier.

✦ TURNKEY

Evnex provides a turnkey EV charging solution, including hardware, installation and connectivity. 12/7 technical support is provided via email or phone for EV drivers and fleet managers.

✦ QUALITY NZ MANUFACTURED HARDWARE

Available in single phase 7.4kW through to three phase 22kW AC. All charge points include cellular, Wi-Fi and Ethernet connectivity options and 6mA DC leakage current detection.

✦ CLOUD MANAGED

All Evnex products are connected to the cloud, enabling simple configuration, RFID access control and smart charging features such as group / cluster load balancing.

Employee In-Home Charging

If you're providing EVs for your employees to take home then safety, reliability and reimbursement of electricity costs will be front of mind.

✦ EASILY REIMBURSE ELECTRICITY COSTS

Simply set your employee's electricity cost, and then each month generate a usage report for reimbursement.

✦ HOME OVERLOAD PROTECTION

All home charge points are installed with our switchboard mounted power sensor. If the home energy use approaches its limit, the charge point will seamlessly reduce charging speed to avoid a blown fuse.

Workplaces and Apartments

Providing EV charging facilities in workplaces and apartments presents some common challenges. It's important to ensure that you size your installation for growth, and choose a smart solution that makes access control and cost reporting straightforward.

Evnex makes it easy by providing the full suite of solutions, from initial inspection, right through to installation and service.

✦ ALWAYS ONLINE

A connected charging solution means firmware updates are delivered automatically over-the-air. Charge point management, scheduling and usage reports are available via the Evnex portal, from anywhere in the world.

✦ GROUP LOAD BALANCING

When planning an EV charger installation, it's often not cost effective or necessary to specify the supply infrastructure so that all EV chargers can operate at full speed at the same time. For these installations Evnex provides a group load balancing solution to make the best use of your existing electrical capacity.

✦ RFID ACCESS CONTROL

For cost reporting usage, or to prevent unauthorised access, RFID cards can be provisioned and managed via the Evnex cloud portal.

How To Get Started

Our nationwide team are available now to help you begin your EV journey.

BOOK VISIT

While residential installations can often be quoted without a visit, most commercial or apartment based installations will require a site inspection.

Get in touch with our friendly team to arrange a visit from one of our EV charging experts.

RECEIVE QUOTE

Once we've assessed your site capacity and installation complexity, we'll let you know the cost.

INSTALLATION

Once the quote has been accepted, we'll arrange the installation. To ensure a high quality job and the best customer experience, only approved Evnex partners can install our products.

TRAINING

The final part of the installation experience is making sure your staff or tenants know how to use the system. We'll commission your charge points in the Evnex cloud portal, and you'll be charging in no time.

ONGOING SUPPORT

Our team are available 12 hours a day, 7 days a week to provide technical support and assistance.

Pricing

CHARGE POINT INSTALLATION

Standard home installation - 7.4kW single phase	From \$1995.65 + GST
Standard home installation - 22kW three phase	From \$2,604.35 + GST
Commercial & non-standard home installations	Inspection & quote required

ANNUAL INSPECTION

For single charge point (within 50km of Evnex service centre)	\$250 + GST
For multiple charge points 2+ (within 50km of Evnex service centre)	\$150 + GST (per charger)

Note - Annual inspection is essential for all publicly installed charge points, and highly recommended for workplace charge points.

SOFTWARE & CONNECTIVITY

Business Charge software subscription (flat rate regardless of number of connected chargers) All chargers are connected to the internet and cellular connectivity is included in the subscription.	\$9 + GST / Month
---	-------------------

Note - Business Charge connections are billed via credit card. Large corporate accounts may be issued an invoice by arrangement, invoicing services may incur a processing fee.

* All charge points require a software subscription to operate.

Please refer to Terms and Conditions. All Evnex charge points must be installed by an Evnex accredited installer.
Evnex charge points are OCPP1.6J compatible, however connection to a 3rd party OCPP software provider will incur costs.

OUR VALUES

1. DELIVER POSITIVE IMPACT

We're in business to deliver meaningful, lasting impact. We're passionate about supporting the growth of cleaner technologies and finding ways to minimise the footprint of our operations.

4. INVEST IN THE TEAM

We support our people with opportunities for growth and learning. We recognise the importance of balance and wellbeing.

2. DELIVER OUTSTANDING SERVICE

We deliver experiences that create happiness for our customers, and each other.

5. HOLD HIGH EXPECTATIONS

Our mission demands our dedication. We communicate clear and consistent expectations and encourage constructive feedback. We hold each other accountable.

3. BE AUTHENTIC AND RESPECTFUL

We tell the truth and build trust by living our core values. We look after one another and encourage diversity of thought.

6. STAY FOCUSED

We only pursue opportunities where we know we can be the best. We move fast and take calculated risks.
