

Cisco ISE Health Check Service

Overview

The **Cisco ISE Health Check Service** is designed to provide customers with an expert-level view on their existing ISE environment, and how the network is performing to support their business requirements and most critical use cases. It helps identify gaps and provides recommendations to help remediate issues to ensure the network is fully optimized.

Discovery

- Conduct workshop with customer to understand requirements.
- Information Gathering
 - Assessment of the existing ISE environment (ISE Use cases used, endpoint types, authentications, PKI environment details, network devices, Mobile Device Management Integration).
 - Configuration from CL, GUI-based analysis, passed/failed authentications, ISE policies, pxGrid integration.
- Review collected data and document findings.
 - Identify gaps and improvements.

Recommendations

- Provide feedback and recommendations on:
 - Configuration and ISE Policies.
 - Software Versions and System performance.
 - Device Integrations.
- Identify areas of improvement and overall optimization of Cisco ISE environment.
- Review Cisco ISE features that can help address new business requirements.

Deliverables

- Executive Summary Presentation
- Health Check Review Report
- Findings and Recommendations Document
