Cisco DNAC TEST DRIVE

Service Overview

At Netnology, we specialize in Cisco Digital Network Architecture (DNA) Center implementation services to expedite the adoption of Cisco DNAC. This test-drive offer will help customers develop a baseline understanding of Cisco DNAC Solution and its value proposition. This up to 4-hour session will demonstrate use-cases related to Cisco DNAC. It will also highlight the ease of configuration and manageability of this integrated solution. This test-drive is built and delivered by subject matter experts (SME) who have extensive experience in working with Cisco DNAC.

Solution Overview

Cisco DNA Center is the foundational controller and analytics platform at the heart of Cisco's intent-based network. It supports the expression of intent for multiple use cases, including base automation capabilities, fabric provisioning, and policy-based segmentation in the enterprise network. Cisco DNA Center brings context to this journey through the introduction of Analytics and Assurance by providing end-to-end visibility into the network with full context through data and insights. The key features of Cisco DNAC include:

- Support Intent-Based Networking
- Simple and Fast Network Management
- Increased Network Uptime
- Effective Monitoring
- Lower Operation Costs
- Future Network Optimization
- Network Transform with New Technologies
- Embedded Security

Service Benefits

Netnology has a team of world class engineers who specialize in Cisco DNAC solution and are passionate about customer success. Netnology will partner with you to provide guidance on:

- Design the network using intuitive workflows.
- Define user and device profiles that facilitate secure access and network segmentation based on business needs.
- Policy-based automation to deliver services to the network based on business priority and to simplify device deployment.
- Assure network performance with real-time and historical data analytics, to provide actionable insights and detect problems before they happen along with guided remediation actions.

Service Scope

As part of this up to 4-hour Test Drive engagement, Netnology will provide the following services:

- Solution Overview
- Operational Insights
  - Overall Health of the Network Devices and Health Scores for Wired and Wireless Clients
  - AI Driven Data
- Client Health
  - Overall, Client Health
  - Client 360
  - Intelligent Capture
- Device Health
- Issues Dashboard
- SWIM Update
- Wi-Fi Dashboard

Target Audience

This service is designed for Pre and Post sales professionals selling, configuring, deploying, and managing the Cisco DNAC.
