

Cisco Hyperflex Health Check Service

Overview

The **Cisco Hyperflex Health Check Service** provides customers with an expert-level view of their existing Hyperflex environments and details how the Hyperflex is performing to support their business requirements and most critical use cases. It additionally helps to identify gaps, provide recommendations, and remediate issues to ensure that the Hyperflex solution is fully optimized.

Discovery

- Conduct workshops with customers to understand requirements.
- Information Gathering
 - Hyperflex topology
 - UCS Manager and Hyperflex Connect version checks
 - Virtualization version compatibility checks
- Review and document collected data and findings.
- Identify gaps and potential improvements.

Recommendations

- Provide feedback and recommendations on:
 - UCS Manager and Hyperflex Connect version upgrades
 - Virtualization version upgrades
 - Advanced functionalities
- Identify areas of improvement and overall optimization of the Hyperflex solution.
- Review Hyperflex capabilities that may help address new business requirements.

Deliverables

- Executive Summary Presentation
- Health Check Review Report
- Findings and Recommendations Document
