Cisco FSO
Health Check Service

Overview

The **Cisco FSO Health Check Service** provides customers with an expert-level view of their existing FSO environments and details how the components are performing to support their business requirements and most critical use cases. It additionally helps identify gaps, provide recommendations, and remediate issues, to ensure Cisco FSO is fully optimized.

Discovery

- Conduct workshops with customers to understand requirements.
- Information Gathering
  - FSO Topologies
  - Agent version checks
  - Licensing checks (tests volume, IWO components)
  - Integration alert checks
  - IWO automation rules based on business intent
- Review and document collected data and findings.
- Identify gaps and potential improvements.

Recommendations

- Provide feedback and recommendations on:
  - Agent upgrades
  - Usage-based license adjustments
  - Advanced functionalities
- Identify areas of improvement and overall optimization of FSO environment.
- Review FSO capabilities that may help address new business requirements.

Deliverables

- Executive Summary Presentation
- Health Check Review Report
- Findings and Recommendations Document
