

VeloCloud SD-WAN Health Check Service

Overview

The **VeloCloud SD-WAN Health Check Service** is designed to provide customers with an expert-level view on their existing SD-WAN environment, and how the network is performing to support their business requirements and most critical use cases. It helps identify gaps and provides recommendations to help remediate issues to ensure the network is fully optimized.

Discovery

- Conduct workshop with customer to understand requirements.
- Information Gathering
 - Network topology of existing SD-WAN environment.
 - Configuration from SD-WAN routers and other relevant outputs.
 - Configuration details from SD-WAN Orchestrator.
- Review collected data and document findings.
 - Identify gaps and improvements.

Recommendations

- Provide feedback and recommendations on:
 - Profile configuration
 - Business Policy
 - Advanced Functionalities
- Identify areas of improvement and overall optimization of SD-WAN environment.
- Review SD-WAN configuration that can help address new business requirements.

Deliverables

- Executive Summary Presentation
- Health Check Review Report
- Findings and Recommendations Document

Award-Winning SDx and Cloud Solution Provider
