THREE CHANNEL

SPECIFICATIONS

POWER INPUT

85-125 VAC, 47-440 Hz 16 Watts maximum

POWER TO SENSORS

13.80 VDC @ 13 ma

RELAY OUTPUTS

SPST normally open dry contacts 1.25 AMPS, 120 AC/DC switches when an alarm condition occurs

WEIGHT DIMENSIONS

6 LBS. (W) 9" x (H) 10.5"

SENSOR CABLE

Shielded 22 AWG UL-E118830 CM Maximum length 2000 feet

ENCLOSURE OPERATING TEMPERATURE

NEMA 4X -40° to 140° F

AUDIO/VISUAL CONSOLE

Audible alarm - 95 dB pulsing horn with 30 second timeout

RED light -Indicates liquid alarm for LF-series float sensor TEST BUTTON- When pressed will test system electronics

GREEN LIGHT- indicates the power is on

Horn off button - Silences the audible alarm when pressed

SENSORS

(3) LF-1 Single float liquid level sensor, normally closed

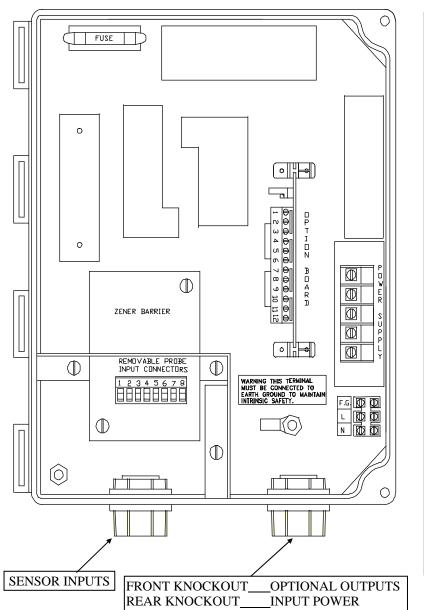

ACCESSORIES

RA-1 audio/visual remote annunciator

LABELS

Provided with controller

NOTE: To maintain proper shielding, BLACK sensor wires and SHIELD DRAINS should not be connected together at sensors.

Liquid Level Float Sensors

- Stainless Steel or Brass Mountings
- 1 to 6 Actuation Levels
- Lengths to over 11 feet
- U.L. Recognized, CSA Listed

LF series float sensors have multiple options including material of construction, mountings and float sizes. This allows for the LF sensor to be extremely versatile in a wide range of applications such as water, oils, chemicals and corrosive liquid.

LF-* switches are U.L. Approved for Class I, Division 2, Groups A, B, C, D hazardous locations. FM Approved explosion proof junction box must be installed for Class I, Division I, Group D hazardous locations.

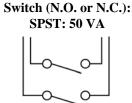

Specifications

Operating Temperature	Water: to 180 F Oil: -40 F to +230 F	40 F to +300 F				
Stem & Mounting Material	Brass	316 Stainless Steel				
Max Length (Lo)	120" (305 cm)					
Float Stops*	Beryllium Copper	316 Stainless Steel				
Compatible Controllers	Consult factory					
Approvals	U.L. Recognized, CSA Listed					

Specifications subject to change without notice, verify with manufacturer.

Group 1 Switch (N.O. or N.C.): SPST: 50 VA

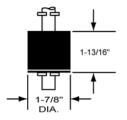

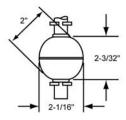

Group 2

Standard setup is Group 2 unless otherwise specified.

BUNA N Float

Stainless Steel Float

Consult factory for materials other than stainless steel and $\mbox{\sc BUNA}$ N.

OMNTEC

LF Series Sensor

Switch actuation levels are determined following the guidelines below:

All units 72" or less overall unit length with Stainless Steel or Buna N floats.

A = 1-1/2" (38.1mm) minimum distance to highest level (2" (50.8mm), Type 5 only)

 $\mathbf{B} = 2''$ (50.8mm) minimum distance from end of unit to lowest level

C = 3" (76.2mm) minimum distance between levels

 $\mathbf{D} = 1/4$ " (6.3mm) minimum distance between actuation levels (Note: One float for two levels can be used only when low level is N.C. dry and high level is N.O. dry) * Actuation level distances and L₀ (overall unit length) are measured from inner

surfaces of mounting plug or flange ** Length Overall $L_0 = L_1 + Dimension B$.

See mounting Types for Maximum Length values

Notes:

- 1. A, B and C dimensions based on a liquid specific gravity of 1.0
- 2. One float for two levels can be used only when 20VA switch is used
- 3. Actuation levels are calibrated on descending fluid level, with water as the calibrating fluid, unless otherwise specified
- 4. Tolerance on actuation levels is +/- 1/8" (3.2mm)

Actuation Levels 2" NPT Brass L6 unless otherwise specified L5 I F-* (supplied by OMNTEC) **BUNA N Floats** L3 L2 L1

WARRANTY

The seller OMNTEC Mfg., Inc. warrants to buyer defects when properly installed, and maintained by user. The sellers sole obligation is to repair or replace parts found to be defective, or non-conforming for one year and only after evaluation by factory. The liability of the seller shall not exceed the price paid for the components found to be defective. The above warranty is exclusive of all other warrantees whether implied or expressed. Seller assumes no obligation for special or, indirect damages incurred by user.

All standard tank gauging systems are free of defects when properly installed and maintained by user. Warranty on tank gauging systems will only be effective after proper documentation has been submitted by the buyer to OMNTEC Mfg., Inc. The sellers sole obligation is to repair or replace parts found to be defective, or non-conforming for one year and only after evaluation by factory. The liability of the seller shall not exceed the price paid for the components found to be defective. The above warranty is exclusive of all other warrantees whether implied or expressed. Seller assumes no obligation for special or indirect damages incurred by user.

All standard replacement parts, "add-ons", or spare parts are free of defects when properly installed and maintained by user. The sellers sole obligation is to repair or replace parts found to be defective or non-conforming for 90 days and only after evaluation by factory. The liability of the seller shall not exceed the price paid for the components found to be defective. The above warranty is exclusive of all other warrantees whether implied or expressed. Seller assumes no obligation for special or indirect damages incurred by user.

Equipment not covered by this warranty includes, but is not limited to: custom equipment, pressure transducers, and control systems.
