Math Data Recording Sheet

1. Std = Standard/ Grade of the children being assessed; S.No. = Serial number (1,2,3, and so on)

2. Please ensure that all fields are filled

3. Each child should only be marked at their highest learning level. This means that for each assessment cycle, there should be only one tick in front of each child.

4. Cross-check the totals. The sum of children at the different levels should equal to total children tested. For example, if you have 50 children in the class, sum total of Beginner + 1-digit + 2-digit + Addition + Subtraction + Word Problem should be equal to 50.
