

SAFESCAPE MULTI-BUND

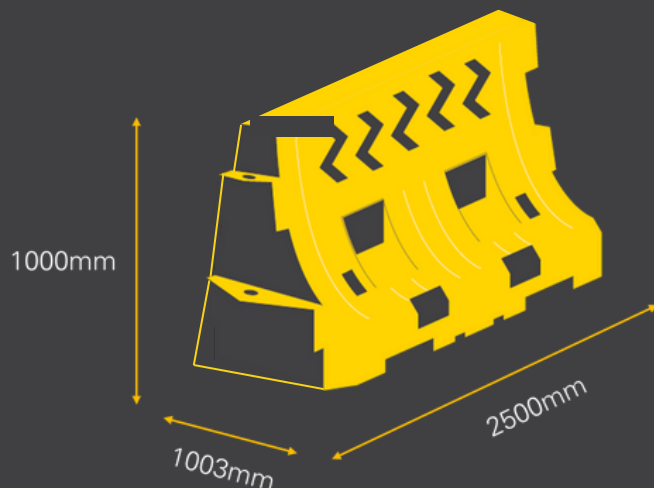

Safescape Multi-Bund has been designed as a modular, light weight, bunding product for use in the mining industry. It can be used empty for delineation of pedestrian access areas or filled with concrete (or other material) for heavier duty applications.

Multi-Bund has six bolt down points for Gewi bars or equivalent up to 45mm diameter where additional anchoring may be required. Multi-Bunds are joined using connecting bolts.

To discuss Multi-Bund for your project or to obtain a quote please contact us.

Weight.
Unfilled – 75kgs/2500mm bund

FEATURES

- Increased safety performance through delineation of pedestrian access, specifically around heavy equipment
- The shape of Multi-Bund has been designed to fit large vehicle tires to ensure a safe and consistent stop
- Can be filled with concrete, sand or water
- Highly visible in all mining conditions and available in multiple colours and a glow in the dark option
- Designed for easy transportation, handling and re-use
- Effective for use as indicators for various mining activities or areas (i.e. ROM pad indicators or tipping points)
