

## HELICAL / SCREW PILE

Helical Piles or Screw Piles are steel tubulars that have had helix/helix's welded to them to allow the pile to be screwed into the ground. We use our high-quality repurposed steel tubulars for these piles and so the piles can benefit from the carbon saving that this offers. The piles are made in-house and manufactured to the requirements of the client.

Helical Pile Sizes		
Pipe OD (mm)	Flight OD (mm)	Flight Thickness (mm)
88.9	100-450	10-15
114.3	100-450	10-15
139.7	100-450	10-15
177.8	100-450	10-15
219	100-450	10-15

- API 5CT L80 (552Mpa) minimum grade
- Carbon Saving against using prime material
- Cut to any length helping to reduce waste and saving our customers money
- Certified Welding
- NDT testing by a third party can be arranged
- Lab testing of the tubulars can be arranged
