

## IN-HOUSE MANUFACTURED CASING

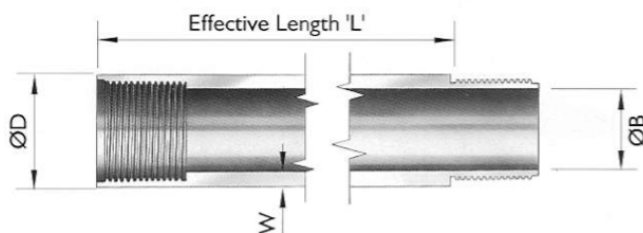

**John Lawrie Tubulars** has further outlined its commitment to supporting the construction and structural sectors by investing in a number of new assets and yard facilities, making it the most valuable one-stop, fully in-house service provider in the UK. These new facilities also mean we are perfectly positioned to offer services to new clients in the mining, water wells and minerals industries.

### Rotary Percussive

We manufacture a range of rotary percussive casing in both coupled (available up to 178 mm) and friction welded styles (available up to 152.4 mm).

### BS 879

We manufacture strong steel flush-jointed casing for use in conjunction with shell and auger tools threaded to BS 879 (water well casing). Up to 16" dia can be supplied in lengths up to 12 mtr and above this diameter up to 3 mtr effective.

### BS 4019

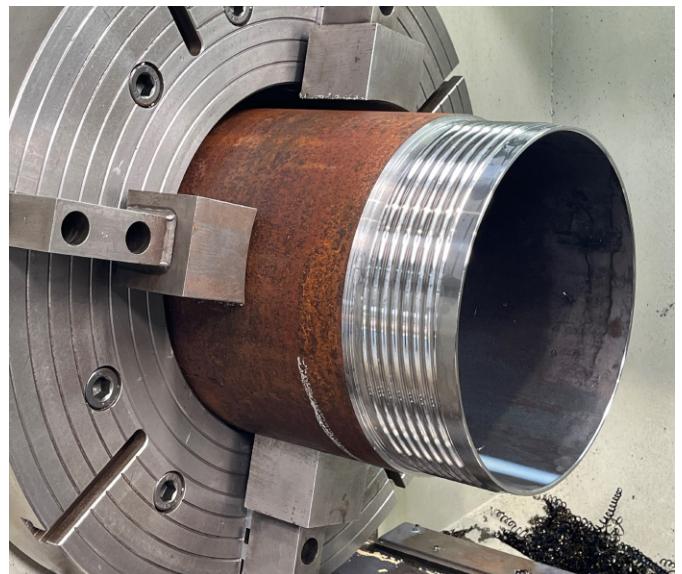

We manufacture core drilling equipment casing in W series thread styles from AW ( 57 mm ) up to ZW ( 219 mm ) – lengths can be supplied up to 12 mtr if required.

### Large Piling Casing

We supply steel tubular piling casing from sizes 406 mm up to 914 mm dia x 3 mtr effective length.

### Micropile /Piling casing

Our vast range of micropile stock ranges in size from 60.3mm to 406mm diameter x 12 mtr effective –along with various types of cut or threading.

### Casing Advancement Systems

We supply a range of casing to suit various casing advancing systems (Overburden Drilling Systems) that are available in the market today. It is recommended that any new system be checked to ensure correct casing sizes are requested.
