

Clean Air as a Service

For every indoor space

Clean Air as a Service

We take care of everything by delivering a fully managed solution

By choosing Pro-Tect Design & Technology as your clean air partner you can rest assured that you are getting the very latest in medical grade air purification technology for ultimate protection and reassurance in any indoor space.

Our goal is to work in partnership with you to devise the optimum clean air solution for your business needs. We can tailor this solution to satisfy your individual requirements.

What we offer in our **Clean Air as a Service** solution:

Planning

A skilled member of our team will conduct an on-site assessment to understand your current situation and requirements.

Supply

Once a solution has been agreed, we will arrange for all the necessary logistics required to ensure smooth delivery and set up.

Design

Our comprehensive consultation ensures all your needs are satisfied and we create a safe working environment for your staff, customers and visitors.

Manage

We look after all future maintenance including servicing units and replacing old filters for you.

How it works

We deliver a fully managed solution

The technology

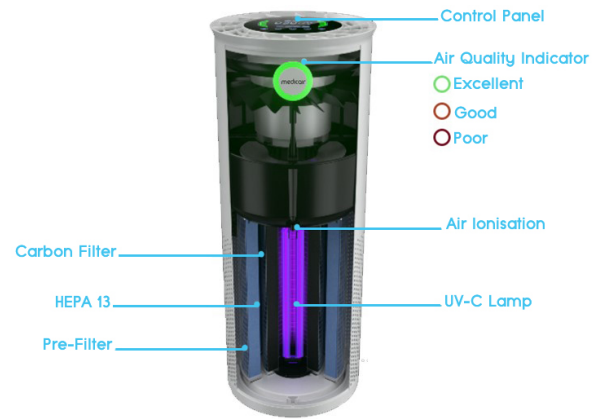

MedicAir® offers a unique solution for purification and filtration of air, improving air quality and reducing the incidence of suspended viruses, bacteria and numerous other harmful contaminants commonly found throughout indoor air.

The MedicAir® unit utilises a custom engineered five-stage air purification process and has a potential throughput of over 600m³, operating at a maximum of only 60db.

Our innovative 'ReAKT' technology system prolongs filter life and our 'self-change' filters ensure there are no expensive engineer call-outs for routine maintenance. Our combination of filters also helps to eliminate odours, formaldehyde and

other volatile organic compounds from the indoor setting, providing an enhanced indoor breathing environment.

The anti-bacterial coated HEPA-13 filter has a market leading 6.7m² surface area and filters out 99.97% of all particles down to 0.3 microns, whilst our activated carbon layer removes harmful chemicals and odours, before our 24 Watt virus-killing UVC bulb eliminates viruses and other microscopic contaminants.

Always connected

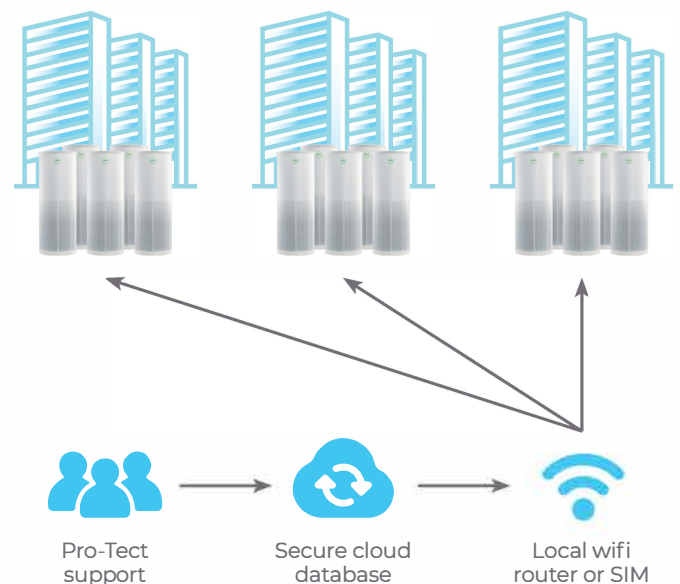

WiFi enabled app available on the App Store and Google Play

Our solution allows our devices to be controlled from anywhere in the world.

It allows you to audit as necessary and manage your devices across multiple locations for optimal efficacy.

- Auto/sleep & On/off timer settings
- Scheduling across multiple devices and locations
- Air quality monitoring and reporting
- Regular filter replacement reminder
- Remotely monitored

Pro-TectTM

Design & Technology

We have a team on hand to help you with whatever questions you might have.

Whether you are an existing valued customer or a potential customer in need of some advice, we would be delighted to arrange a consultation with you.
