

Rethink Your Current Teller Solution

The Next Payments Teller CashIO automates cash handling at the cashier by offering an industry first true cashier assisted terminal with five cassettes and fast bundled note acceptance.

Pay Out All Denominations From Under The Counter

Stack And Clear Up To 50 Notes In One Transaction

Issue A High Value Ticket From The Cashier

Reads Tickets

Utilises Multi Denomational Coin Dispenser

Acts A Secure Safe For High Cash Volumes

Stacks And Stores Up To 2,500 Notes And Tickets

Compact Efficiency

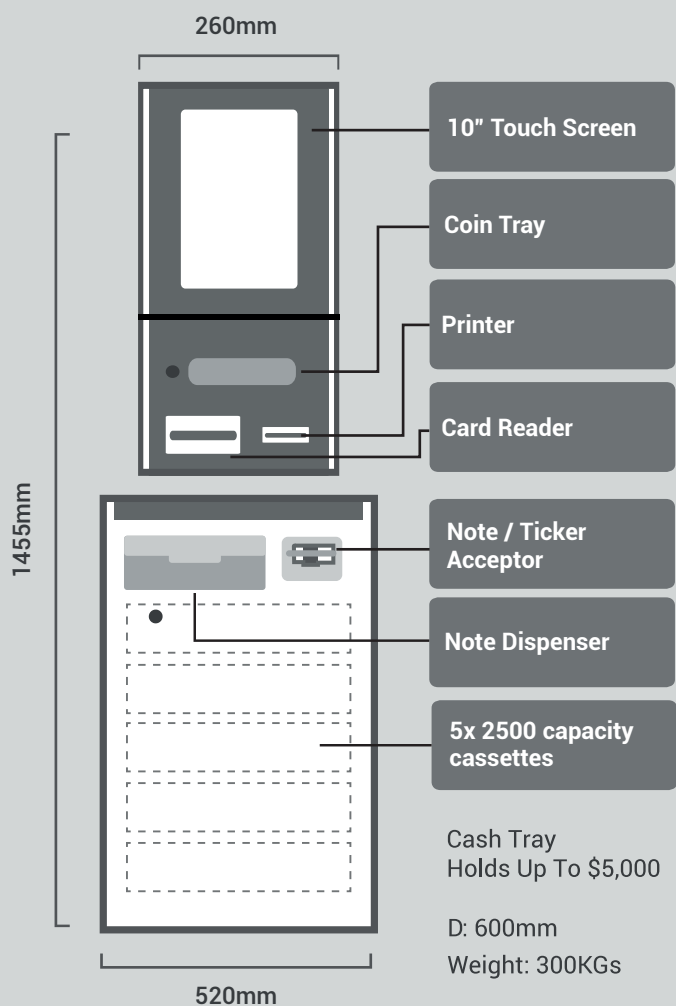

The Next Payments Teller CashIO has been designed with clubs and pubs in mind. The compact designed cash dispenser can be installed under the counter of most cashiers (830mm high) yet still accommodates five cash cassettes into one cash dispenser, dispensing \$100, \$50, \$20, \$10 and \$5 notes to your customers in the denomination of their choice. The Teller CashIO features a JCM bunch note acceptor with the ability to take up to 50 notes at a time.

Improves Customer Service

The Teller CashIO allows the cashier to take high volume bundled notes and issue a ticket directly to the customer within seconds, eliminating any queues and improving customer satisfaction and up time. Importantly, Teller CashIO uses on one universal coin hopper that sorts and dispenses 12 coins per second eliminating the need for multiple hoppers and reduction of counter space. The unit dispenses five notes per second.
