

Saffire EVO LZ-I

Cloud-Connected Smart Interconnected Lock

Applications

- Ideal for new construction projects or retrofits
- Get real-time notifications including events and access anomalies
- Manage access rights to allow or revoke access for residents and visitors in real-time, from anywhere
- Easily send digital keys or PIN codes to residents and visitors from a mobile device
- Residents can use their mobile device, RFID credentials or PIN to access their residence or common areas
- Provide convenient one-time or recurring access PIN to service and maintenance personnel
- Control when and where residents and visitors can go throughout the building
- Lost access media can be quickly deleted to keep the building secure

Overview

Saffire EVO LZ-I is a cloud-connected RFID lock that combines high-performance with aesthetics, seamlessly integrating with building technology providers and amenities for multihousing properties. The Saffire EVO LZ-I provides an easy-to-use, secure, and flexible solution with the benefits of real-time connectivity. It includes the convenience of using either mobile devices, RFID credentials, or secure PINs for access to resident units, common areas and perimeter doors.

Security with IoT connectivity

The Saffire EVO LZ-I is equipped with Wi-Fi onboard, ensuring connectivity to the dormakaba Lyazon cloud and seamless

integration to our Lyazon partner platforms for real-time events and user notifications. Online connectivity of the Saffire EVO LZ-I also provides continuous updates for built-in device security.

Designed for our aggregator partners

The Saffire EVO LZ product lineup is specifically designed to be integrated with our dormakaba Lyazon partner platforms to ensure a premium user experience for multifamily residents. The dormakaba Saffire EVO LZ cloud-connected smart locks allow easy access management of residences, amenities, common areas and perimeters, all through a single integrated platform.

Security features

- Online connectivity ensures continuous firmware updates for increased device security
- BHMA A156.12 Grade 2
- UL C10 3-hour fire rating
- Non-volatile memory maintains lock programming and audit records
- Staff monitoring with RFID keycard audits
- Tamperproof design
- No need to visit the lock to update access

Factsheet

Mechanical Features

Description	Single motion egress electronic interconnect lockset with clutch mechanism. Online connectivity ensures continuous updates for increased device security. Supports dormakaba RFID, Bluetooth®, and keypad credentials
Handing	Left or right factory handed mortise, field reversible handing (lever and mortise)
Levers	Troy, Essen, and Von levers (field reversible). Custom lever options available, consult with your sales representative
Finishes	Trim finishes: satin chrome C (626), oil-rubbed bronze Z (613)**, bright chrome R (625), satin nickel N (619) and black K (622). Polycarbonate: black (B), graphite gray (R), white (W)
Door Thickness	From 1 3/8" to 2 1/2" (35 mm to 66 mm)
Standard Backset	ASM: 2 3/4" (70 mm)
Locking Options	ANSI/BHMA Grade 2 with 1" deadbolt and 1/2" latch bolt; available in either 4" or 5 1/2" common center line
Batteries	3 AA. Low battery indicator for preventative maintenance is both local visual and event notification populated in system. Passive warning and notification
Concealed Key Override	Optional: Lori KIK core (keyed-alike, master key)
Electronic Battery Backup	Electronic lock power supply (ELPS) battery back-up. ELPS part number 118-515990
Wi-Fi Online Control	Wi-Fi 802.11 b/g/n WPA2, WPA AES 128 and TLS 1.2, > -70dB signal strength at the lock

Mobile Access

Bluetooth® Enabled	Bluetooth® Low Energy 2.4 GHz version 4.2, iOS or Android mobile device support, AES 128 and DTLS security, supported through partner mobile app
---------------------------	--

** Oil-rubbed bronze is a PVD finish

Lock Operation

No Touring	New credentials applied to lock through Wi-Fi
Electronic Access	User defined: customizable access for residents, visitors, and property managers available through partner application
Date/time Stamp	Real time: date and hours/minutes; automatically adjusts for daylight savings time
Toggle Mode	Use of credential is needed to "lock" the door after exiting unit, this stops accidental resident lockouts and delivers full audit trail to ownership/management
Credential Formats	dormakaba ComID high security credentials 13.56MHz MIFARE DESFire EV3 ISO card or fob / Mobile access credentials (Bluetooth®) / 6 digit PIN codes
Feedback LED	Light indicators
Diagnostics	Lock diagnostics done through partner application
Memory	Non-volatile memory stores up to 5,000 door events
Privacy Override	Default emergency key only (user selectable)

Certifications & Testing

Certification	ANSI/BHMA A156.12 Grade 2, Florida Building Code HVHZ / Non-HVHZ
Accessibility Standard	Complies with 2010 ADA Standards for Accessible Design. Must be installed according to ADA and local requirements
Fire Rating	Meets UL 10C and ULC S-104, on fire door rated up to and including 3 hours
Electronics	Compliant with RED Directive 2014/53/EU for electromagnetic compatibility and FCC part 15 and RSS-247 Industry Canada requirements
Environmental Operating Conditions	-31°F to 158°F (-35°C to 70°C), 0% to 90% non-condensing humidity at 86°F (30°C) Meets IP54

Warranty

Standard Warranty	Two years
