More than an Outdoor CompanySM

Water with Blessings "Water Women" who have been using their Sawyer filters since 2008.

SINCE 1984

Every Sawyer product you buy contributes to our common humanity, bringing Sawyer water filtration systems to people in need all around the world. Over the past 10 years we've teamed up with over 140 charities in 80 countries to provide long-term sustainable relief domestically, internationally, and in disaster situations. Together, we're saving millions of lives.

Thank you.

WATER FILTRATION

Sawyer set the new standard for water filtration when we introduced hollow fiber membranes to the outdoor industry over a decade ago. Our line of innovative products offer solutions for any situations, from the backcountry to the remotest corners of the world.

THE SAWYER STANDARD

When you want to be sure your water is safe to drink, use a Sawyer Filter. Sawyer hollow fiber membranes are the highest quality in the industry and here's why:

FIBER STRENGTH - KNOWN AS HOOP STRENGTH

SAWYER HOLLOW FIBER MEMBRANES

OTHER HOLLOW FIBER MEMBRANES

WHAT IT MEANS:

Thicker fiber walls and smaller inner diameter of the fibers make Sawyer fibers stronger than fibers of other typical hollow fiber membranes.

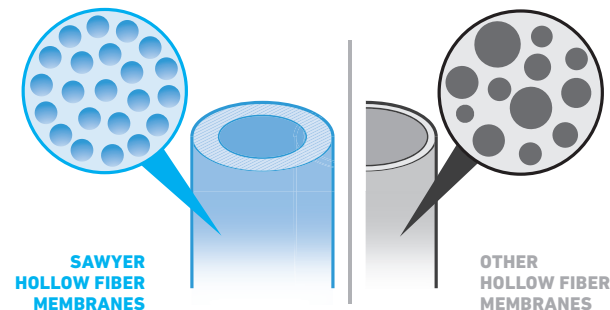

WHY IT'S IMPORTANT:

Stronger fibers allow for aggressive backwashing and shock resistance. Meaning each Sawyer filter can be continually backwashed forcefully restoring up to 98% of the original flow rate.

Because of this exclusive technology, the Sawyer Mini Filter™ and Micro Squeeze Filter™ can be cleaned and reused for up to 100,000 gallons. The Squeeze Water Filter™ offers a lifetime guarantee.

Read the entire Sawyer Hollow Fiber Filter Strength Report at:
Sawyer.com/downloads

ABSOLUTE MICRONS

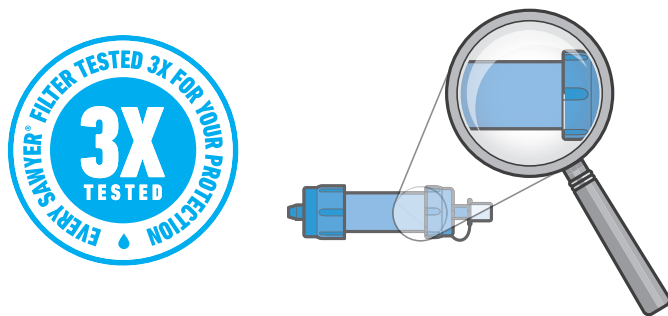

WHAT IT MEANS:

- No pore is larger than 0.1 micron in Sawyer filters.
- Sawyer WILL not use average or nominal pore size ratings.

WHY IT'S IMPORTANT:

- Without absolute pore size, larger holes are present which could allow bacteria, protozoa, cysts, or viruses to pass.
- No harmful bacteria, protozoa, or cysts can pass through the Sawyer 0.1 micron filter.
- All Sawyer filters will remove 100% of microplastics from the water.

100% INDIVIDUALLY TESTED 3 TIMES

WHAT IT MEANS:

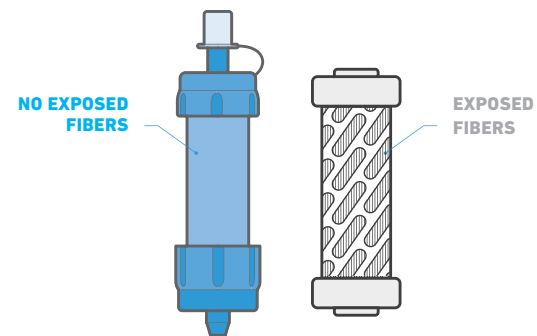

Every Sawyer filter is performance tested three different times during the manufacturing process for your protection.

WHY IT'S IMPORTANT:

To ensure every Sawyer filter is 0.1 absolute micron and that no harmful pathogens can pass through the filter.

Every filter is 3X tested. Sawyer does NOT batch test or statistically test for failure. Testing occurs after the fiber element construction and twice after casing assembly to ensure no harmful pathogens leak through the sealed case or internal o-rings.

PROTECTED FIBERS

WHAT IT MEANS:

Our hollow fiber membranes are fully encased and sealed to keep them protected.

WHY IT'S IMPORTANT:

When fibers are not enclosed, physical damage of exposed fibers could allow harmful pathogens to pass through.

SQUEEZE FILTERS

A thru-hiker favorite for its no-fuss, easy maintenance design. The Squeeze Filter is fast flowing and ideal for multi-day hikes, and groups.

SP129

SQUEEZE WATER FILTRATION SYSTEM

UPC: 0-50716-00129-7 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Squeeze Filter
- 2- 32 oz Squeeze Pouches
- Gravity tubing
- Inline adapters
- Cleaning Plunger
- Mesh Carrying Case/Gravity bag

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Lifetime Warranty

FIELD WEIGHT: 3 oz

MICRO SQUEEZE

Everything you love about the Squeeze
in a lighter, more compact body.

SP2129

MICRO SQUEEZE FILTER

0-50716-02129-5 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Micro Squeeze™ Filter
- 32 oz Squeeze Pouch
- Drinking Straw
- Cleaning Coupling
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Up to 100,000 gallons

FIELD WEIGHT: 2 oz

MINI FILTER

Our lightest filter that lacks no versatility and is easy on the wallet.

MINI WATER FILTRATION SYSTEM

CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Mini Filter
- 16 oz Squeeze Pouch
- Cleaning Plunger
- Drinking Straw

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Up to 100,000 gallons

FIELD WEIGHT: 1.8 oz

TAP FILTER

Safe drinking water directly from your tap or hose bib.

SP134X

TAP WATER FILTER

0-50716-00134-1 | CASE PACK: 2

KIT INCLUDES:

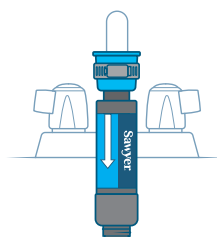

- 0.1 Micron Absolute Hollow Fiber Membrane Tap Filter
- Cleaning Plunger
- Tap/Spigot Adapter
- Reducer Bushings
- Extension Hose

REMOVES: Bacteria, Protozoa, Cysts, & Microplastics

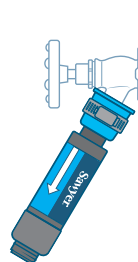

FILTER CAPACITY: Up to 100,000 gallons

FIELD WEIGHT: 4 oz

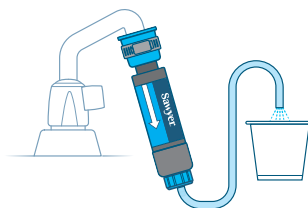

WAYS TO USE

Filter from Tap

Spigot
(Hose bibs)

Extension Hose
(For shallow sinks)

FAST AND SAFE DRINKING WATER:

- After hurricanes
- Boil alerts
- Traveling overseas
- Removes all microplastics

GRAVITY FILTER

Great for groups and base camp.

SP160

ONE GALLON GRAVITY FILTER

UPC: 0-50716-00160-0 | CASE PACK: 4

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Filter
- Dual Threaded Mini Filter
- One Gallon Bladder
- Gravity Tube
- Cleaning Plunger
- Cleaning Coupling
- Hose Guide

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Up to 100,000 gallons

FIELD WEIGHT: 8 oz

WATER FILTRATION BOTTLES

Simply fill and drink.

SP140 WATER FILTRATION BOTTLE 1 LITER

UPC: 0-50716-00140-2 | CASE PACK: 2

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Squeeze Filter
- 1 Liter Bottle
- Spare Drinking Straws
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Lifetime Warranty

FIELD WEIGHT: 5.5 oz

SP840 WATER FILTRATION BOTTLE 24 OZ

UPC: 0-50716-00840-1 | CASE PACK: 2

KIT INCLUDES:

- 0.1 Micron Absolute Hollow Fiber Membrane Dual Threaded Mini Filter
- 24oz BPA Free Tritan Bottle
- Spare Drinking Straws
- Cleaning Plunger

REMOVES: Bacteria, Protozoa, and Cysts

FILTER CAPACITY: Lifetime Warranty

FIELD WEIGHT: 5.5 oz

UPC: 0-50716-00108-2 | CASE PACK: 2

KIT INCLUDES: 1 - 1 Gallon Bladder

SP110

INLINE ADAPTERS

UPC: 0-50716-00110-5 | CASE PACK: 12

KIT INCLUDES: Inline Adapters

SP150

CLEANING COUPLING

UPC: 0-50716-00150-1 | CASE PACK: 12

KIT INCLUDES: 1 - Cleaning Coupling

SP115

FAST FILL INLINE ADAPTERS

UPC: 0-50716-00115-0 | CASE PACK: 12

KIT INCLUDES: Quick Disconnects, Tubing, 28mm Adapter

REPELLENTS

From the backcountry to the backyard, our repellents offer long lasting, effective protection for the entire family.

PERMETHRIN

Clothing & gear treatment.

REPELS AND KILLS

For use on clothing, tents, sleeping bags, and other outdoor gear, Sawyer Permethrin is more than just an insect repellent — it actually kills ticks, mosquitoes, spiders, chiggers, mites, and more than 55 other kinds of insects.

LASTS 6 WEEKS OR 6 WASHINGS

Providing a fantastic odorless barrier of protection, a single application of Permethrin lasts for 6 weeks or 6 washings. Using it on outdoor gear also helps reduce the mosquito population in your camp.

PROTECTION FROM DISEASES

Repels mosquitoes which may carry the Zika Virus, Yellow Fever, Dengue, and Chikungunya. Repels and kills ticks which may carry Lyme Disease.

ODORLESS

Sawyer Permethrin is odorless after drying and won't damage fabrics, finishes or interfere with waterproofing.

PROTECTION FOR YOUR DOG

Sawyer Permethrin can be applied to dogs and help control mosquitoes, and fleas for 35 days and against ticks for 6 weeks. Official application instructions for use on dogs can be found at sawyer.com/dogs.

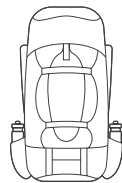

PERMETHRIN PRODUCTS

THINGS TO TREAT

Treatment for clothing, footwear, work wear, bibs, canvas, work-stations, seat covers, dog beds, hammocks, chairs, tents, camping gear, mosquito netting, nets, canopies, screen enclosures, outside of sleeping bags, backpacks, ground cloths, and other fabrics.

PERMETHRIN PRODUCTS

TREATING MADE SIMPLE

This six pack of permethrin includes six individual 4.5 ounce bottles of permethrin and one trigger sprayer. Each 4.5 oz bottle will treat one complete outfit, eliminating the guessing if you've applied the proper amount of treatment to your outfit. An outfit consists of a shirt, pants, and pair of socks.

PERMETHRIN FOR DOGS

Sawyer Permethrin can be applied to dogs to help control fleas and lice for 35 days and ticks for 6 weeks. Protect your pup from disease carrying insects and so they don't bring them home. Visit sawyer.com/dogs for full treatment instructions.

PICARIDIN

The gold standard for topical insect repellents.

EFFECTIVE

Derived from piperine in pepper plants, Sawyer Picaridin is a synthetic replica of a natural solution and is highly effective at repelling mosquitoes, ticks, and is more effective than DEET at repelling flies such as biting flies, black flies, sand flies, gnats chiggers, fleas, and no-see-ums. Additionally, it won't damage gear or equipment like liquid DEET. Picaridin repels mosquitoes which may carry the Zika Virus, Yellow Fever, Dengue, and Chickungyna, and repels ticks which may carry Lyme Disease.

LONG LASTING

Picaridin spray lasts 12 hours against mosquitoes and ticks and while the lotion lasts 14 hours. Both spray and lotion repel flies for 8 hours.

FAMILY FRIENDLY

Picaridin is a great for the whole family and is also safe for use during pregnancy. It's considered to be the repellent of first choice by the Public Health Agency of Canada's Canadian Advisory Committee on Tropical Medicine and Travel for travelers as young as 6 months.

ECO FRIENDLY

Sawyer's BOV (bag on valve) continuous spray contains no propellants like an aerosol, so you get more repellent and limit the propellants in the environment. It also sprays in all directions.

DEET

DEET has a long documented use by humans without any credible scientific evidence that it is harmful to humans. Often when people experience negative affects when using DEET in liquid form, it is not the DEET itself that is causing the irritation but the alcohol the DEET is mixed with.

Alcohol is very rough on the skin. Unfortunately many people have the misconception that if they use a lower percentage DEET (like a 30% can of aerosol DEET). They are “safer” because they are exposing themselves to less of the chemical. Unfortunately that 30% DEET is mixed with alcohol and alcohol opens up the pores, irritates your skin and the effectiveness of the DEET diminishes quickly. This is why you constantly have to reapply multiple times throughout the day.

DOSAGE VS CONCENTRATION

When using a lower concentration of DEET like a 30%, you are still exposing yourself to pure 100% DEET molecules, just a smaller amount of them so the effectiveness diminishes quicker. Therefore, our recommendation is to bypass the alcohol altogether and skip right to 100% DEET. By using a smaller dose of a higher concentration of DEET you can apply the repellent less frequent and avoid loading your skin with irritating alcohol. At the end of the application you have the same amount of DEET molecules on your skin to repel bugs.

CONTROLLED RELEASE

20% Controlled Release, low DEET absorption formula. Reduces DEET adsorption by 67% per application. Provides 11 hours of protection from mosquitoes..

SUNSCREEN

Our sunscreen is formulated to work, whether you're playing hard or working hard. The unique bonding base makes it longer lasting, and more comfortable, so you can focus on your adventure.

SUNSCREEN

Once you try it, you'll know.

SAWYER STAY-PUT SERIES

Sawyer Stay-Put® SPF 30 sunscreen uses a non-greasy, “Breathable Matrix” Formula that spreads into all layers of your skin, uniquely penetrating where other sunblocks simply can’t go. This allows Stay-Put sunscreen to bond with the skin while allowing sweat and water to pass over the sun-blocking compounds to prevent them from deteriorating.

Enriched with aloe vera and vitamins, Stay-Put SPF 30 is recommended for most uses, and a single application penetrates deep into your skin for all day sun protection. It's also engineered to be effective when combined with Sawyer insect repellents.

A SOLID BOND, A BREATHABLE MATRIX

While most sunscreens hold their lotions in the top two layers of skin, our Stay-Put SPF 30 sunscreen uses a special technology to bond the sun ray absorbing agents deeper into the skin.

The Stay-Put formula was engineered to spread the same volume of lotion over a larger cubic area of skin, requiring less lotion per area of skin and producing a more comfortable, breathable feel — all while providing great all-day protection. You'll hardly know you're wearing sunscreen.

FIRST AID

Sawyer's first product in 1984 was the Extractor® Bite and Sting Kit and to this day it remains a staple item in camping departments. We're also proud to partner with Sam Medical to provide the most advanced splints and blister technology.

FIRST AID

Bites, blisters, and broken bones, we've got you covered.

THE EXTRACTOR® PUMP, SINCE 1984

Successfully used for over 30 years, the Extractor Pump is also a safe and useful first aid device for treating bee and wasp stings as well as spider, scorpion, fly, or mosquito bites.

The lightweight, small, and reusable Sawyer Extractor Pump Kit extracts venom and poisons from the bites and stings of snakes, bees, and more. The double chamber vacuum pump action is designed to provide powerful suction for the extraction of venoms and poisons without the need for scalpel blades or knives used in other kits. Because it's a pump — not a syringe — it's easy to use with one hand.

It most effectively retrieves venom from extremities and areas of body outside muscle areas; effectiveness varies with the location of the bite.

B6

EXTRACTOR® PUMP KIT

UPC: 0-50716-00224-9 | CASE PACK: 6 or 4 (B4)

KIT INCLUDES:

- Extractor® Pump
- Alcohol prep pads
- Adhesive bandages
- Sting care wipes
- Razor (for hair removal)
- Instruction manual

FIRST AID PRODUCTS

B2

EXTRACTOR® MINI PUMP KIT

UPC: 0-50716-00222-5 | CASE PACK: 6

The Extractor® Mini Pump helps relieve swelling from bug bites and sting in as little as 5 seconds. It includes an educational booklet on all things bite and stings.

KIT INCLUDES:

- Extractor® Mini Pump
- Bite and Sting Manual

INTERNATIONAL IMPACT

We believe everyone deserves access to clean water; from hikers in the backcountry to indigenous people groups in the remotest corners of the world. With over 15 years of data, we know the impact these filters have on health, the economy, and the environment is unlike anything ever done. Join us on the journey.

FILTERS PROVIDED

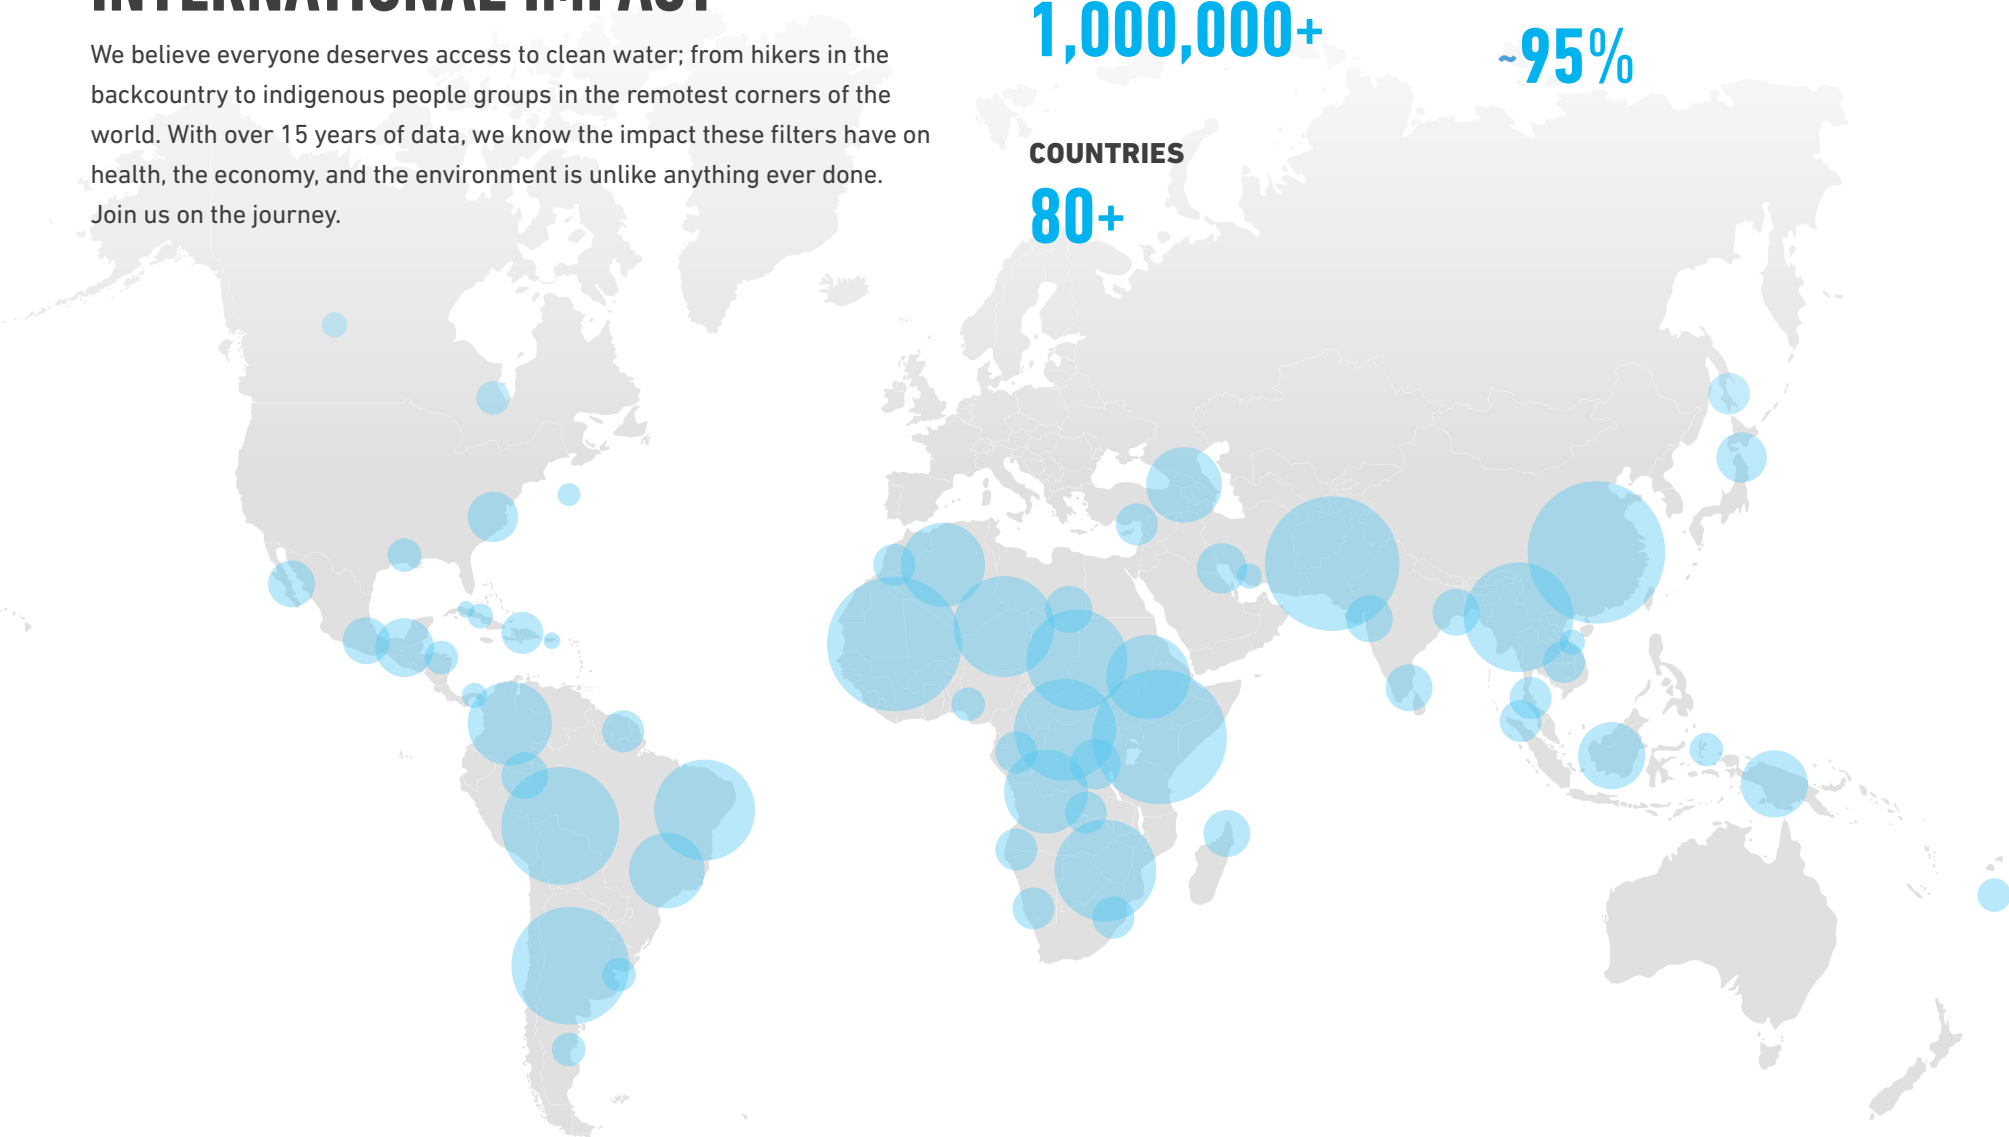

1,000,000+

DISEASE REDUCTION

~95%

COUNTRIES

80+

FIJI

By 2024, the entire country of Fiji will have clean water. There are filters that were installed in 2008 still in use on a daily basis.

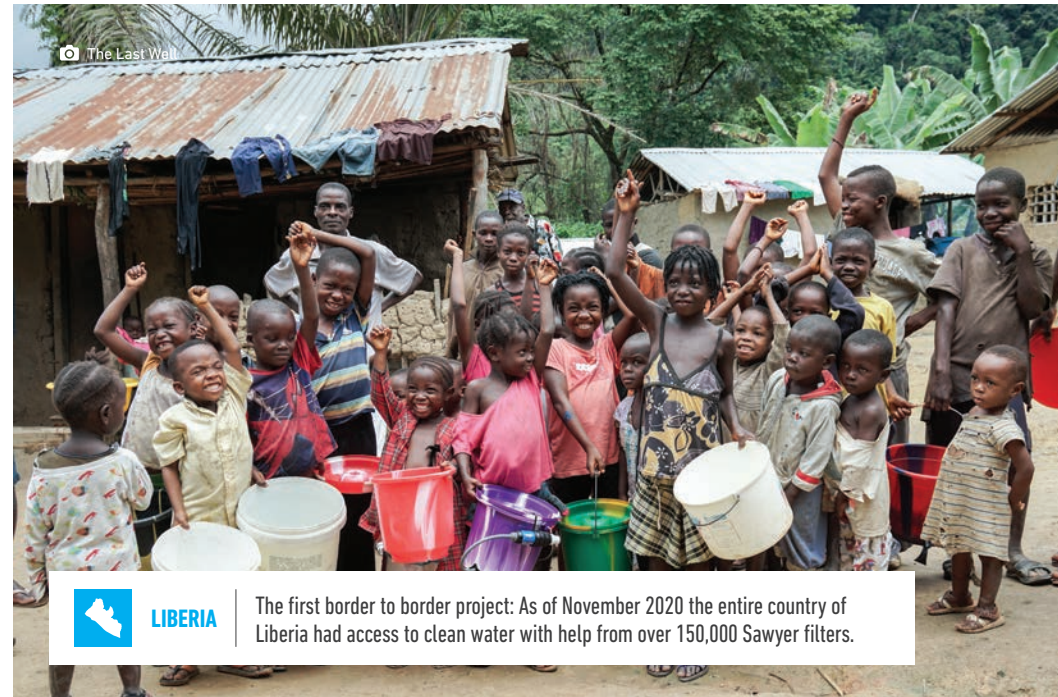

**PAPUA
NEW GUINEA**

Filters are being provided to medical clinics in remote islands and villages in Papua New Guinea.

**PUERTO
RICO**

After hurricane Maria in Puerto Rico, over 200,000 Sawyer filters were dispersed to provide immediate access to clean water.

LIBERIA

The first border to border project: As of November 2020 the entire country of Liberia had access to clean water with help from over 150,000 Sawyer filters.
