1. Describe what you think happened during the last day.

> BATTERY LEVEL

2. Charging Rates

| 40 minutes to charge 40\% | 30 minutes per $20 \%$ |
| :---: | :--- |
| 20 minutes per__ \% minutes |  |
| $\ldots \% 60$ minutes | $10 \%$ takes___ minutes : $100 \%$ |
|  |  |

3. Work with your group members. Rank the charging rates from slowest to fastest. Use pictures, symbols, and words to explain your ranking.

## Charger A

Charger B

## Charger C

## Charging Rates

## Practice with Charging Rates

4. Determine the faster charger. Explain the strategy you used to determine the answer.

## Charger A

## Charger B

5. Determine the faster charger. Explain the strategy you used to determine the answer.

## Charger C

Charger D

## Charging Rates

## Summary

Determine a percent that would give a slower rate and one that would give a faster rate. Be ready to explain your reasoning.

| Slower rate | Wired Charger | Faster rate |
| :---: | :---: | :---: |
| $60 \min : \ldots \%$ | $60 \min : 24 \%$ | $60 \min : \_$ |$\%$

## Exit Ticket

Gabriel's charger took 3 hours to charge her phone from 0\% to 100\% in 3 hours. Kayla's charger took 2 hours to charge from 50\% to 100\%. Explain whose charger is faster.
