## Effortless opening and closing

Discover for yourself how easy the opening & closing of lift systems can be.

Whether it's the kitchen, bathroom, living room or bedroom there is an AVENTOS system to suit your function & design choices.

HF (high fold) with SERVO DRIVE. Different height fronts are possible

SERVO-DRIVE for AVENTOS. The electrical motion support system can be used with large fronts, with or without handles. Heavy or large fronts open with a light touch and then close again with the press of a button. SERVO-DRIVE for AVENTOS underwent exhaustive testing in the Blum test lab. Opening and closing 80,000 times. When you combine SERVO-DRIVE with AVENTOS lift systems, you will benefit from a five year warranty for all electrical components.

HK-S (high kick-small) perfect for over the fridge, oven or microwave.

NOTE: SERVO DRIVE is not available for the HK-S program

HL (high lift) Ideal for mid height applications or tall units with further fronts above

HS (high swing) Ideal for large single fronts
