

We support the use of sustainable palm oil instead of conventional palm oil and will work to ensure that the food products we buy and sell only contain palm oil from sustainable sources.

Specifically we will:

- i. Look at our supply chain and switch ingredients / products from conventional to sustainable palm oil
- ii. Tell customers, suppliers and staff about our commitment
- iii. Make a long term commitment to ensure that, where palm oil is present in our food supply chain, it comes from sustainable sources
