About Beyond Oil

Beyond Oil™ is a developer and manufacturer of an innovative proprietary and patented formulation which eliminates the Free Fatty Acids ("**FFA**") from cooking oil while preserving the oil's quality and nutritional values. Beyond Oil's process is more cost efficient than the current refinery process. In addition, because Beyond Oil's process does not involve massive heating it does not destroy the vitamins and other nutritional values in the oil and does not produce harmful body toxins. Beyond Oil's process is considered safe and environmentally friendly.

The resulting issuer (“**Resulting Issuer**”) intends to sell Beyond Oil’s proprietary process to two main markets: (a) the food service frying industry; and (b) the oil refining industry.

Cautionary Note

Completion of the Proposed Transaction is subject to a number of conditions, including but not limited to, Canadian Securities Exchange acceptance of the proposed listing, and the completion of the concurrent financing (“**Concurrent Financing**”). There can be no assurance that the Proposed Transaction will be completed as proposed or at all.

Investors are cautioned that, except as disclosed in the prospectus to be prepared in connection with the Proposed Transaction, any information released or received with respect to the Proposed Transaction may not be accurate or complete and should not be relied upon.
