## IUD Services

IUD Consultation

IUD Insertion

IUD Follow-up

IUD Removal

IUD Removal and Replacement

\*Emergency IUD Insertion

(effective up to 7 days from unprotected intercourse)

\* Referring office must call and fax urgent requests

## Nexplanon Subdermal Implant

Consultation

Placement

Removal

We recommend that patients do not fill a prescription for an IUD/ Nexplanon prior to the appointment to prevent arriving with the wrong device unless the referring practitioner is familiar with all forms of long-acting contraception and is confident at prescribing the correct device ( e.g. a removal and replacement ).

All devices (IUD and Nexplanon) are available for purchase on-site at the clinic.

## Referral Instructions

1. Please attach all relevant information. BMI, Gravidity, Parity, current medications, relevant consults and lab reports, pap history, and pelvic US (if available). Patient with BMI > 35 please refer to gynaecology.
2. We will notify your patient with an appointment date and time.
3. After consultation, we will provide the referring physician with a consult letter outlining diagnostic conclusion, treatment/procedure, and follow up recommendations.
