

WHAT IS HUMA BLEND?

Huma Blend is a unique blend of natural occurring products which have been processed and enhanced to provide a blend of enriched organic nutrients with natural enhancements. Huma Blend is composed of Huma K Source, Seaweed Powder, Yucca, and Fish Protein.

APPLICATION

For soluble fertilizers, blend 2-3% Huma Blend with the fertilizer. For dry bulk fertilizers, add 5-10 lbs. per bulk ton for best results. Huma Blend can also be mixed with foliar fertilizers. DO NOT mix with calcium nitrate.

Not for use in organic crop and organic food production in the State of California

HUMA BLEND

BENEFITS

Because of the materials in this blend, they have a synergistic effect on each other, which means that they have natural tendencies to compliment each other, making each ingredient more effective.

GUARANTEED ANALYSIS

- Total Nitrogen (N).....2.0%
- 2.0% Ammoniacal Nitrogen
- Soluble Potash (K₂O).....8.0%
- Sulfur (S).....1.0%

Derived from Potassium Hydroxide, Ascolphyllum nodosum

Also contains Nonplant Food Ingredient.

40% Humic Acids derived from Leonardite
