

# CF #1

# 0-0-1

*Brings your soil to life!*

## WHAT IS CF #1?

CF #1 is a liquid compost tea, made from organic ingredients, that performs many functions in crop production. This liquid compost enhances soil quality and boosts soil microbiology which benefits your crops in numerous ways.

### CF #1 is Composed Of:

- Humic Acid
- Seaweed
- Fish Protein
- Sugars

Not for use in organic crop and organic food production in the State of California

## Benefits of Using CF #1

- CF #1 stimulates root development
- It helps increase the nutrient uptake in the plant
- Improves yields and quality
- Increases microbial action in the soil
- Provides essential amino acids
- Provides a source of carbohydrates and proteins.

## Application

CF #1 is best applied to crops in 10 gallons per acre water run, injected through the sprinklers or drip line. This should be repeated 2-3 times during the growing season.
