

# LIQUID SEAGOLD

## 7-0-0

### BENEFITS

- Source of Nitrogen
- Stimulates the development of micro-organisms in the soil.
- Provides a source of chitin.
- Aids the recuperation of the plant growth and development of new roots.
- Re-establishes optimal metabolic activities.

### WHAT IS LIQUID SEAGOLD?

Liquid Seagold is a unique blend of natural products from the sea. This material is high in organic matter and levels of chitin. Chitin is the most efficient means of biologically controlling diseases caused by nematodes during the production cycle, by feeding the biological life that eats chitin based organisms. It is also a great source of nitrogen for plant nutrition and contains other natural ingredients, which may stimulate plant growth.

### SEAGOLD COMPOSITION:

- Nitrogen ..... 7.0%
- 0.10% Ammoniacal Nitrogen
- 0.02% Nitrate Nitrogen
- 2.82% Urea Nitrogen
- 4.06% Insoluble Nitrogen
- Phosphate ..... 0.0%
- Potassium ..... .05%
- Chitosan Oligo Saccharin.....3%

Derived from Shrimp and Crab Shells and Urea

**Also Contains:** Iron, Sulfur, Seaweed, Molybdenum, Boron, Manganese, and Zinc

**Not for use in organic crop and organic food production in the State of California**

### APPLICATION

Liquid Seagold can be used strictly as a fertilizer. It should be applied early before planting for best results. Liquid Seagold is also compatible with most fertilizers and chemicals and can be used in all soil types. However, it is always advisable to consult your representative before blending with other chemicals. Contact your sales representative for application rates.
