

NUT CHAMP

WHAT IS NUT CHAMP?

Nut Champ foliar is a unique blend of Humic Acids, Molasses, Nitrogen, Phosphorous, Potassium, and Seaweed. These readily available nutrients give the plant a boost, especially when waking up from the winter. Nut Champ will help

increase the bee activity, which should help increase the pollination during the crucial bloom

period. Nut Champ is compatible with most commonly used pesticides. Prior to use, always make a jar test of the products before making a tank mix to check physical compatibility. This product may be used in plain steel, stainless steel, aluminum, or plastic applications equipment. Always clean equipment following use of this product.

Guaranteed Analysis:

Total Nitrogen2%

Available Phosphoric Acid4%

Soluble Potash4%

Upon request other micro-nutrients and GABA may be added.

Not for use in organic crop and organic food production in the State of California

Benefits of Using Nut Champ

Nut Champ helps correct nutrient deficiencies. It gives your plants a jump-start and gets them growing quickly during early stages of growth or with pre-bloom sprays.

Application

Nut Champ may be applied by conventional ground rig sprayers or by air. For general use on all crops, apply Nut Champ at a rate of 1-2 gallons per acre in orchards and 1-2 gallons per acre in row crops. For additional application directions for alfalfa, broccoli, brussel sprouts, carrots, cauliflower, cabbage, citrus plants, corn, cotton, cucumbers, deciduous fruit and nut trees, grapes, lettuce, celery, melons, onions, peas, beans, peppers, garlic, potatoes, spinach, squash, sugar beets, tomatoes, and eggplant, please consult your sales representative.
