

The most natural sounding hearing protector in the world. The standard for amplified musicians, DJs, vocalists, sound engineers and gig-goers.

SNR 17

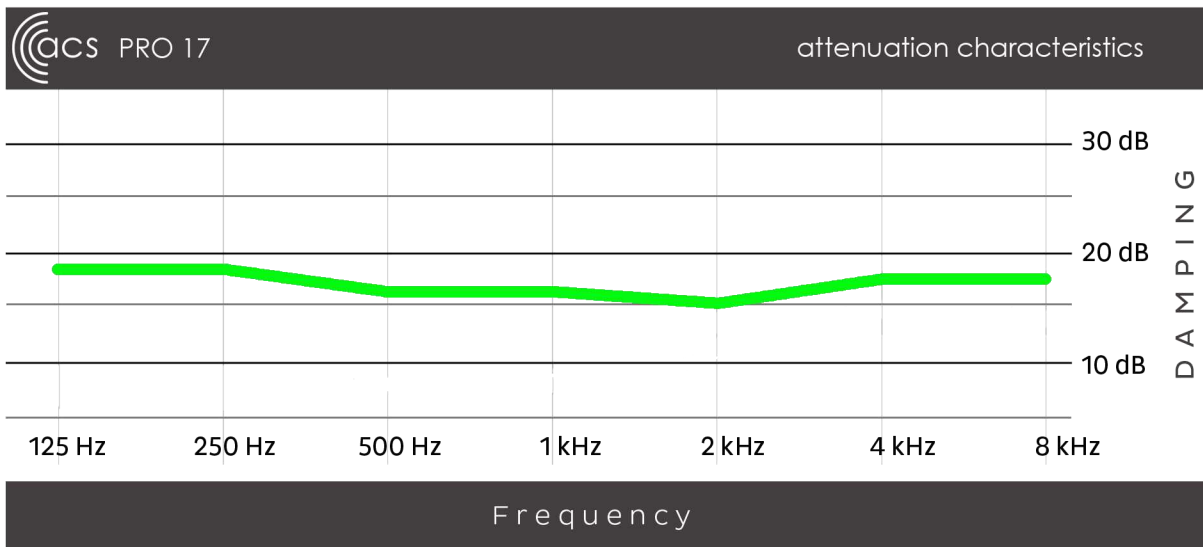

The revolutionary PRO series of hearing protectors enable you to play, produce and listen to music at safer volumes without making you feel isolated from your environment. Custom moulded to your ears, these professional hearing protectors are manufactured from soft, medical grade silicone. They are comfortable, discreet and are available in a wide range of colours and levels of attenuation (damping) to suit a wide range of ambient sound levels.

The PRO-17 is the flattest response filter in the PRO range. Designed specifically for musicians and vocal performers, the PRO-17 gives one of the most accurate responses of any hearing protector with flat 17dB protection across the board, allowing you to hear the music just as it should sound but just quieter with no loss of fidelity. Its vented design helps in reducing occlusion giving your voice a more natural sound so you can concentrate on your performance. PRO 17 is the perfect choice for anyone who needs to hear clearly in noise levels of up to 100dB.

Acoustic Specification

Minimum guaranteed damping level (dB)	125 Hz	250 Hz	500 Hz	1 kHz	2 kHz	4 kHz	8 kHz	H	M	L	SNR
PRO 17	18	18	16	16	15	17	17	16	16	16	17

Weight	3g Net 83g Gross Average weight will vary according to ear size	
Build Material	40 Shore Medical Grade Silicone	
Mould Type	Canal Mould	
Standard Colour	Clear	
Included Accessories	Instruction Leaflet, Wax Pick, Comfort Cream, Carry case	
Optional Accessories	Neck cord, Grips	
Package Dimensions	100mm x 55mm x 38mm	
Warranty Period	1 Year against manufacturing and component failure	
Tested to conform to EU Noise at Work Standard EN352-2		
Attenuation Determined by BSI Product Services (0086), Maylands Avenue Hemel Hempstead, Herts, HP2 4SQ
