

Reflexion AI leverages Axiom for continuous assessment for ISO27001 and SOC2 Type 1 standards and DevSecOps Implementation

Challenges

Reflexion AI would like to achieve ISO27001 and SOC2 Type 2 due to increasing privacy concerns over Audio/Video content. Reflexion doesn't have a CISO or expertise to take the Cybersecurity roadmap.

Solution

Axiom worked with Reflexion on continuous assessments, implementation of controls required for ISO27001 and SOC2 Type 1, and implement DevSecOps

Outcomes & Results

- Implemented DevSecOps pipeline within 15 days.
- Through continuous penetration testings, identified and fixed over 100 vulnerabilities before going to production.
- Implemented over 200 controls required for ISO27001 and SOC2.

AWS Tools Used

- AWS CodeBuild
- AWS Security Hub
- Amazon Inspector
- Amazon GuardDuty
- AWS KMS
- AWS CloudTrail
- AWS WAF
- Amazon S3
- AWS Lambda
- Amazon Simple Notification Service
- Amazon EventBridge
- Amazon Kinesis Data Firehose
- Amazon Macie

About Reflexion.ai

Sciffer Analytics is a Singapore based startup that has created Reflexion.ai, an all-in-one platform for broadcasters and media companies to collaborate on content, extract metadata and storyboard.
