What is vendorse?

Vendorse provides a complete cloud-based platform for organisations to effectively manage and risk assess their supply chain.

Vendorse achieves supply chain compliance by ensuring that suppliers complete the designated actions and abide by the latest policies and procedures at all times, whilst ensuring that their respective profiles are kept up to date.

SUPPLIER ONBOARDING

Simple and effective supplier onboarding process that sends a request to the designated supplier to complete their profile. Suppliers will provide relevant details surrounding scope of supply, standards compliance with associated certification.

Vendorse provides system administrators with the flexibility of configuring the platform to suit the needs of their organisation. This includes:

Supplier Categorisation
Supplier Scoring System
Company Policies
Users and Roles

COMPANY CONFIGURATION

SUPPLIER REVIEW

Upon completion of the initial supplier request details, users are able to review supplier details, certifications and documentation provided in a concise format.

Based on the risk assessment conducted, Vendorse is able to automatically identify the supplier with the appropriate categorisation level.

SUPPLIER CATEGORISATION

SUPPLIER RISK ASSESSMENT

Using a custom scoring system, as per company configuration, assessors are able to conduct an effective assessment of the supplier, scoring them on key metrics such as expenditure, environmental impact, safety, security etc. resulting in an overall risk score.

Organisations can ensure that policy definition and updates are effectively managed through Vendorse by ensuring that suppliers, not only acknowledge policy during their onboarding process, but are also automatically notified of any policy updates for them to review and acknowledge thereafter.

SUPPLIER CHAIN POLICY DEFINITION & UPDATES

SUPPLIER ACTION TRACKING

Users are able to define actions for suppliers to complete as part of their ongoing compliance. The built-in notification and reminder system ensures suppliers complete actions when required, with minimal intervention from the company.

Vendorse allows organisations to customise the brand of their portal in accordance with their company identity and colour schemes.

COMPANY BRANDING
