(Available in both .5ml and 1.0ml pods)

## • Filling and Assembly Instructions

Luster™

### STEP ONE

Insert a filling needle into the space between the airway and the outer wall of the pod. With pod held upright fill both two sides next to airway with 0.5ml of oil (0.25ml for each side).

\*Do not overfill or allow oil to enter the center airway.

### STEP TWO

Immediately after filling, insert and press the top cap piece vertically until it's fully seated.

\*Failure to insert the top cap piece immediately may cause leakage.

### STEP THREE

Push the filled pod into mouthpiece until you hear a click sound.
