Eazie User Manual

Eazie

Smallness, the New Greatness

Discretion Ever So Eazie

Now you see me, now you don't! At just $\frac{3}{4}$ the size of regular vapes, Eazie is housed in a tiny matte-finished body which you can easily conceal at a grip. Keeping a low-profile has never been so Eazie.

Performance That Lasts

Size matters, but so does performance. With a body so small, Eazie packs a large 250mAh battery to ensure a complete experience without having to leave any oil unfinished.

Specs

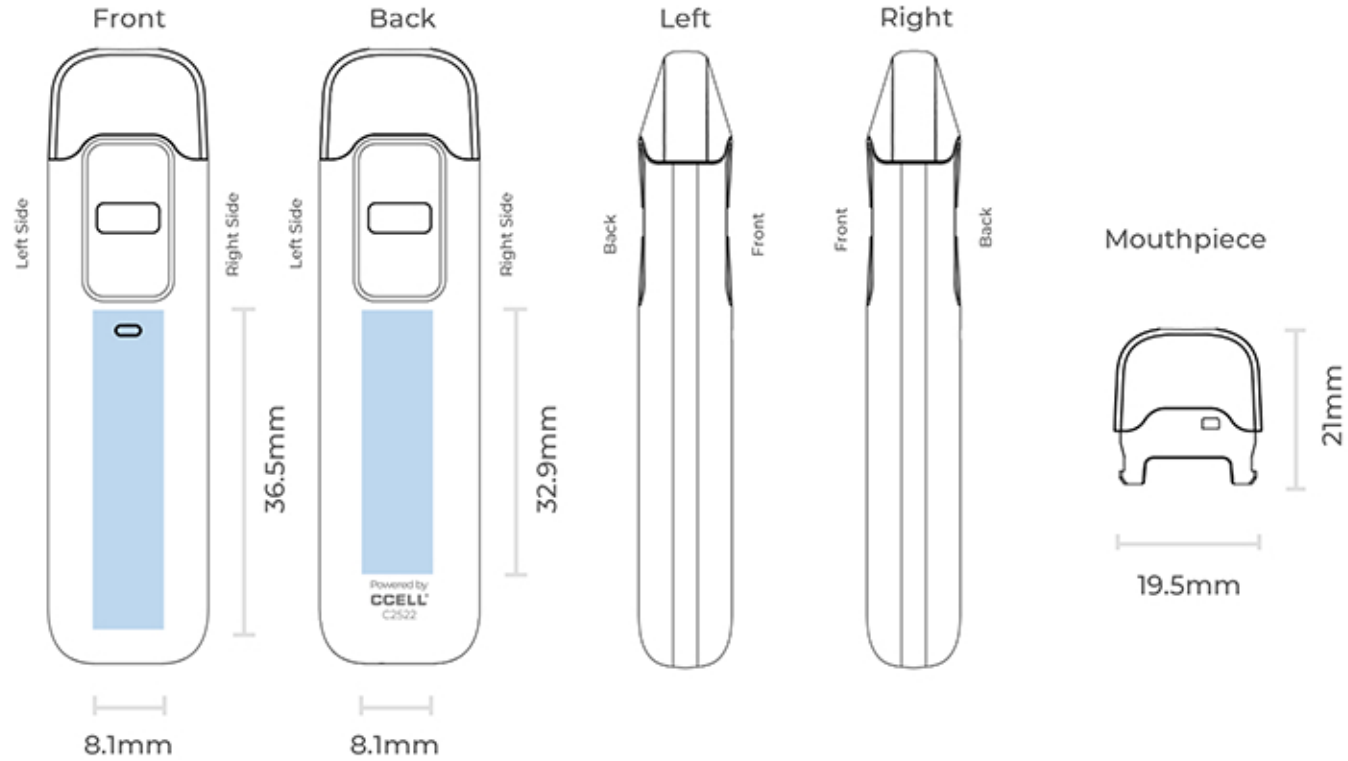

- Tank Volume: 0.3ml
- Battery Capacity: 250mAh
- Dimensions: 75.3H x 19.6W x 11.4D (mm)

Filling and Assembly Instructions

STEP ONE

Fill 0.3ml oil into space around center post, with 0.15ml each side.

STEP TWO

Check if the silicon sealing ring is set in place properly.

Align horizontally to reservoir

STEP THREE

Align mouthpiece with body and press firmly into position.

STEP FOUR

Let filled product sit for 30 min before using.

*Cap within 1 min to avoid leakage.
