

FINANCIAL AND INSURANCE BENEFIT POLICIES

FINANCIAL POLICY

Payment is due on the day of treatment. Patients with dental benefits are responsible for their copay and deductible on the day of treatment. Our dental care team welcomes any questions to make sure our patients are clear about their dental care treatment needs and plan, and their financial obligation to our office.

- Cash, Check and all Major Credit Cards Accepted
- Flexible Spending Accounts (FSA) and Health Savings Accounts (HSA) Accepted
- CareCredit 6 Month Interest Free Financing (application process to apply)

DENTAL INSURANCE BENEFITS

Our office is happy to submit to your dental benefit provider for care received. We do our best to present information regarding your benefit as accurately as possible to our patients; any benefit information is considered an estimate of benefit that may be payable and not a guarantee of payment. Should your dental benefit provider pay less than what was estimated, any remaining balance due becomes your financial responsibility. Our team is knowledgeable in navigating the complex world of dental insurance. For complex cases we are able to request your specific insurance terms, remaining benefits and acquire pre-treatment estimates of benefits prior to procedures.

Dental insurance is a benefit in the form of an allowance determined by a contract between your employer and an insurance company. This employee benefit, usually replenished annually by a fixed amount, can be applied to dental procedures. The specific allocation of your benefits or amount of money that can be applied to a procedure is determined by a negotiation between your employer and an insurance company, over which our dental practice has no control.

*\*Please note that our practice can not process Medicare, HMO or DMO insurance plans.*
