Substance(s) formed under the conditions of use:

Uncured product is irritating to eyes, skin, and respiratory system.

Generates methanol during cure.

# 3. Composition/information on ingredients

### **Mixtures**

Chemical Identity	CAS number	Content in percent (%)*	Notes
(1) TITANIUM DIOXIDE	13463-67-7	1 - <5%	# This substance has workplace exposure limit(s).
Tris(3(trimethoxysilyl)propyl)is ocyanurate	26115-70-8	1 - <5%	No data available.

### 4. First-aid measures

**Ingestion:** If swallowed, do NOT induce vomiting. Give a glass of water.

**Inhalation:** If inhaled, remove to fresh air. If not breathing give artificial respiration

using a barrier device. If breathing is difficult give oxygen. Get medical

attention.

**Skin Contact:** To clean from skin, remove completely with a dry cloth or paper towel,

before washing with detergent and water. If skin irritation occurs: Get

medical advice/attention.

Eye contact: In case of contact with eyes, rinse immediately with plenty of water and

seek medical advice.

Most important symptoms/effects, acute and delayed

**Symptoms:** No data available.

Hazards: No data available.

Indication of immediate medical attention and special treatment needed

SDS\_US 2/13

<sup>(1)</sup> The respirable particle(s) listed above are inextricably bound within the polymer matrix, and therefore does not present an inhalation hazard during normal use of this product. Tooling or machining of the cured product (sanding, cutting, milling) may release hazardous, respirable substances.

Revision Date: 04/24/2017

#### **RTV142**

**Treatment:** This product reacts with moisture in the acid contents of the stomach to

form methanol. Treatment is symptomatic and supportive.

# 5. Fire-fighting measures

General Fire Hazards: Fire residues and contaminated fire extinguishing water must be disposed

of in accordance with local regulations.

### Suitable (and unsuitable) extinguishing media

Suitable extinguishing

media:

All standard extinguishing agents are suitable.

Unsuitable extinguishing

media:

Avoid water in straight hose stream; will scatter and spread fire.

Specific hazards arising from

the chemical:

In case of fire, carbon monoxide and carbon dioxide may be formed. Acute overexposure to the products of combustion may result in irritation of the respiratory tract. Reacts with water liberating small amounts of methanol. This material is reactive with water, but the reaction will not significantly increase the fire severity.

### Special protective equipment and precautions for firefighters

Special fire fighting

procedures:

Move container from fire area if it can be done without risk. Cool fire-

endangered containers with water.

Special protective equipment

for fire-fighters:

Firefighters must wear NIOSH/MSHA approved positive pressure selfcontained breathing apparatus with full face mask and full protective

clothing.

### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures: Keep container closed. Avoid contact with skin and eyes. Remove contact lenses before using sealant. Do not handle lenses until all sealant has been cleaned from the finger and hands. Product releases methanol during application and curing. Keep out of reach of children. See Section 8 of the SDS for Personal Protective Equipment.

Methods and material for containment and cleaning up:

Wipe, scrape or soak up in an inert material and put in a container for disposal. Wash walking surfaces with detergent and water to reduce slipping hazard. Wear proper protective equipment as specified in the

protective equipment section.

#### **RTV142**

# 7. Handling and storage

Precautions for safe handling: Sensitivity to static discharge is not expected. Methanol is formed during

processing. Avoid contact with eyes, skin, and clothing. Wear appropriate personal protective equipment. Do not eat, drink or smoke when using the

product. Wash thoroughly after handling.

Conditions for safe storage,

including any incompatibilities:

Keep away from heat, sparks and open flame. Keep container tightly

closed.

# 8. Exposure controls/personal protection

### **Control Parameters**

**Occupational Exposure Limits** 

Chemical Identity	Туре	Exposure Limit Values	Source
(1) TITANIUM DIOXIDE	TWA	10 mg/m3	US. ACGIH Threshold Limit Values (03 2015)
(1) TITANIUM DIOXIDE -	PEL	15 mg/m3	US. OSHA Table Z-1 Limits for Air
Total dust.			Contaminants (29 CFR 1910.1000) (02 2006)
	TWA	10 mg/m3	US. OSHA Table Z-1-A (29 CFR 1910.1000)
			(1989)

This product contains one or more substances with an occupational exposure limit. However, the respirable particle(s) of this/these substance(s) are inextricably bound within the polymer matrix. Therefore, we do not expect an exposure to this/these substance(s) during normal use of this product. Tooling or machining of the cured product (sanding, cutting, milling) may release hazardous, respirable substances.

# **Appropriate Engineering**

Controls

Eye wash facilities and emergency shower must be available when handling this product. Ventilation and other forms of engineering controls are preferred for controlling exposures. Respiratory protection may be needed for non-routing, or emergency cityustions.

needed for non-routine or emergency situations.

# Individual protection measures, such as personal protective equipment

General information: General (mechanical) room ventilation is expected to be satisfactory if

handled at low temperatures or in covered equipment.

**Eye/face protection:** Safety glasses with side shields

**Skin Protection** 

Hand Protection: Chemical resistant gloves

**Other:** Wear suitable protective clothing and eye/face protection.

SDS\_US 4/13

Revision Date: 04/24/2017

#### **RTV142**

**Respiratory Protection:** If exposure limits are exceeded or respiratory irritation is experienced,

NIOSH/MSHA approved respiratory protection should be worn. Supplied air respirators may be required for non-routine or emergency situations. Respiratory protection must be provided in accordance with OSHA

regulations (see 29CFR 1910.134).

**Hygiene measures:** Provide adequate ventilation. Observe good industrial hygiene practices.

Avoid contact with eyes, skin, and clothing. Wash hands after handling.

When using do not eat, drink or smoke.
